SECTION 1300 REVISIONS

- **SECTION 1302.12.4 - PRIMA FACIE SPEED LIMIT**
This section has been deleted per the Office of Roadway Engineering. Changes in work zone speed limit process now allows for speed limit revisions to be implemented during construction, even if not originally anticipated and included in design. For projects to legally use a speed limit reduction, they need to follow the process that is currently in place and complete a revision form that is signed by the Director. Please contact the Office of Roadway Engineering with questions.
- **Section 1303.22 – Project Control and Reference Points**
Section has been revised to remove outdated grace period of October 15, 2010 and to require all projects use the current [Survey and Mapping Specifications](#), which can be found on the **Office of CADD and Mapping Services**' website.
- **SECTION 1306.3 – ROADS AND PAVEMENTS FOR MAINTAINING TRAFFIC**
Item 448 has been replaced with **Item 441**.
- **SECTION 1307.1 – General** has been revised
From:
As of the first letting of February 2014, the General Summary for all new single-funded projects shall be required in an Excel format using the standard spreadsheet, [GENSUM_VBA_AASHTOWare.xls](#), available on the **Office of CADD and Mapping Services**' CADD external webpage. It is recommended that all multi-funded projects use this Excel spreadsheet as well.

During the transition to this requirement, any new General Summaries that are created must use the GENSUM_VBA_AASHTOWare.xls Excel spreadsheet. Any existing General Summaries can be completed in the method they were started with. The spreadsheet must then be placed into a CADD file. For more detailed information, see Section 502.1 of the **ODOT CADD Engineering Standards Manual**.

To:
The General Summary for all new single **and multi**-funded projects shall be required in an Excel format using the standard spreadsheet, GENSUM_VBA_AASHTOWare.xls, available on the **Office of CADD and Mapping Services**' CADD external webpage.

Added the following verbiage:
The spreadsheet can be copied, or linked, to a CADD file containing a standard sheet border for inclusion in the plan images set, or for printing purposes.

- **SECTION 1307.2.3 - Item Code, Unit of Measure, and Description**
