## 1967 SPECIFICATIONS

The standard specifications of the State of Ohio, Department of Highways, including changes and supplemental specifications listed in the proposal shall govern this improvement.

The right-of-way for this improvement will be provided by the State of Ohio.

I hereby approve these plans and declare the making of this improvement will not require the closing of the highway to traffic and that provisions for the maintenance and safety of traffic will be as set forth on the plans and estimates.

Approved: Date: 3-4-68 — Division Deputy Director
Approved: Date: 4-8-68 — Engineer of Bridges
Approved: Date: 4-30-68 — Engineer of Location and Design
Approved: Date: 4-30-68 — Deputy Director of Design and Construction

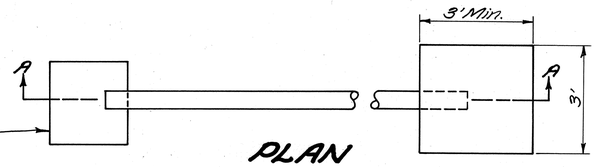
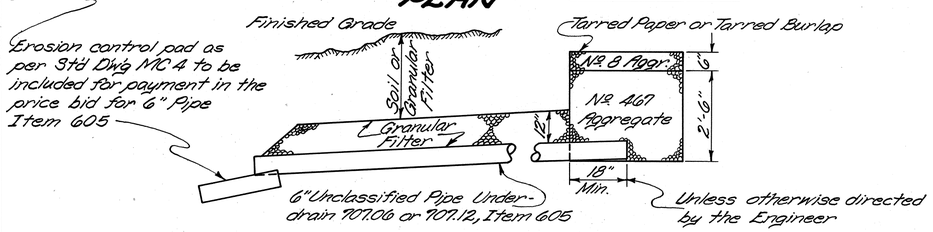
## SPRING DRAIN DETAIL



PLAN



SECTION A-A

NOTE:

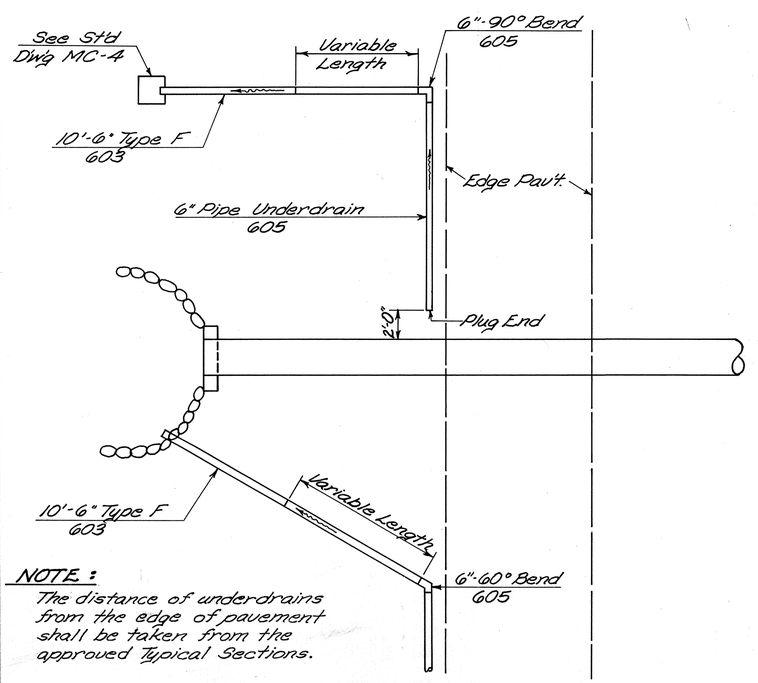
Aggregates, tarred paper or tarred burlap, and necessary excavation for spring drains shall be included for payment in the unit price bid per Lin. Ft. for "Item 605, Aggregate Drains for Springs, as per plan."

The 6" pipe 707.06 or 707.12 shall be covered with granular filter material [605.03(c)] to a height of one (1) foot above the top of the pipe. The remainder of the backfill for this item shall be soil or granular filter backfill placed in accordance with 603.08.

Spring drains shall be built in reasonably close conformity with the detail shown above. The lengths and exact locations of the drains shall be determined by the Engineer.

See note on Sheet No. 6

## UNDERDRAIN DETAIL



NOTE:

The distance of underdrains from the edge of pavement shall be taken from the approved Typical Sections.

# GENERAL NOTES

| FED. RD. DIVISION | STATE | PROJECT | |
|---|---|---|---|
| 2 | OHIO | | |

6/70

HOL-39-(13.22-13.62

**FIELD OFFICE :~** The Contractor shall, in addition to the requirements of 105.152, provide a suitable field office having a minimum of 300 sq. ft. of floor space. The Contractor shall have a telephone installed and maintained in this field office during the construction of this project. The Contractor shall also provide and maintain sanitary provisions as per 107.06. All the above is included in the lump sum price bid for Field Office.

**ROUNDING OF CORNERS SHOWN ON CROSS SECTIONS :~** The rounded corners shown on Standard Drawing MC-1, , apply to all cross sections, even though otherwise shown on these plans.

**UNDERGROUND UTILITIES :~** The locations of the underground utilities shown on the plans have been obtained by diligent field checks and searches of available records. It is believed that they are essentially correct, but the State of Ohio does not guarantee their accuracy or completeness.

**ESTIMATED QUANTITIES :~** Specific locations and usage of estimated quantities set up on this plan to be used "as directed by the Engineer" shall be made a matter of record by incorporation into the final change order governing completion of this project. These quantities shall not be ordered by the Contractor until requested by the Engineer.

**CONSTRUCTION LAYOUT STAKES :~** See note in proposal describing the work included in this lump sum pay item.

**SUPERELEVATION :~** Superelevated curves shall be built without crown. The crown shall be worked out of the pavement in the portion between the beginning of the transition and the point where the superelevation equals twice the crown.

**REMOVAL OF EXISTING PIPE :~** The removal of all existing pipe drains which would normally be removed in various excavation items shall be included for payment in the unit prices bid for the respective excavation items, unless otherwise itemized in the plans.

EROSION CONTROL

Items 601.04, 601.08, and 601.09 are provided in these plans for erosion control. Rock of a stable nature will not be removed in order to place any of these items. The Engineer shall check and non-perform quantities or adjust locations and quantities for these items where indicated by field conditions during construction.

**REMOVAL OF TREES AND STUMPS :~** All trees and stumps specifically marked for removal within the construction limits of this project shall be removed under the lump sum price bid for Item 201 Clearing and Grubbing, except that those trees for which protection and preservation work is indicated elsewhere in these plans shall not be removed.

The following is an approximate estimate of the number of trees and stumps to be removed.

| SIZE | Nº. TREES | Nº. STUMPS |
|---|---|---|
| 18" | 303 | 3 |
| 30" | 5 | 3 |
| 48" | 5 | 0 |
| 60" | 0 | 0 |

The above estimate is approximate and the State of Ohio reserves the right to order the removal of additional trees or stumps outside of the limits of construction but within the right-of-way and/or easement lines. Payment for the removal of these additional trees or stumps shall be included in the lump sum price bid for Item 201 Clearing and Grubbing.

**CUT-OFF WALLS FOR RIPRAP :~** The cut-off walls for Item 601, Riprap using 6" Reinforced Concrete Slab, as per plan, shall be included for payment with this 601 Item.

**DUMPED ROCK CHANNEL PROTECTION IN ROADWAY DITCHES :~** All dumped rock channel protection in roadway ditches shall be 18" thick. It shall be six (6) feet wide except where otherwise shown on plans.

**SOD PROTECTION IN ROADWAY DITCHES :~** All sod protection in roadway ditches shall be six (6) feet wide except where otherwise shown on plans.

**SEEDING :~** Quantities for seeding are calculated for the soil areas between the work limits, as shown on the cross sections.

**ITEM SPECIAL, DRILLED WELL ABANDONED :~** The existing concrete or stone slab well cover and pumping equipment shall be removed and disposed of. The casing shall be cut off at least two (2) feet below the proposed finished grade outside proposed pavement areas or at least two (2) feet below the proposed subgrade elevation inside proposed pavement areas and capped with Class "E" concrete or a standard threaded pipe cap.

The unit price bid for each "Drilled Well Abandoned" shall include payment for all labor, tools, materials, and incidentals necessary to complete this item.

An estimated quantity of 1 Each, has been included in the General Summary for Item Special, Drilled Well Abandoned.

**APPROACHES :~** Mail box approaches and the flared portion of residence drives shall be paved with 5" of Item 304 Aggregate Base and 2-1" courses of Item 404, the remaining length of residence drives beyond the flare shall be paved with 8" of Item 304 Aggregate Base unless otherwise shown in the plans. Field drives shall be paved with 6" of Item 304 from the edge of the bituminous treated shoulder.

Dimensions of drives shall be in accordance with Type 2 Driveway on Standard Drawing BP-6, unless otherwise shown in the plans.

**SPRING DRAINS :~** Reference is made to the detailed drawing on Sheet Nº. 4 showing the method of draining any spring that may be shown on the plan or encountered during construction as determined by the Engineer. The following estimated quantities have been included in the General Summary for this purpose :

| | |
|---|---|
| Item 605-6" Unclassified Pipe Underdrain, 707.06 or 707.12, as per plan | 400 Lin. Ft. |
| Item 605 - Aggregate Drains for springs, as per plan | 40 Lin. Ft. |

The Contractor shall not order materials for "Spring Drains" until authorized by the Engineer and in the event no springs are encountered, the item shall be non-performed.

**TREATED SANITARY FLOW INTO HIGHWAY DRAINAGE SYSTEMS:~**

Treated sanitary flow may be discharged into the highway drainage system provided the owner has secured the approval of the local health authorities and has acquired from the State Highway Department, the official permit to have the connection made.

**ITEM 404, 2 INCH ASPHALT CONCRETE :~** All 2 inch Item 404 Asphalt Concrete specified in these plans shall be placed in two-one inch courses.

**FEDERAL AID CONSTRUCTION IDENTIFICATION SIGNS :~**

The Contractor shall furnish, erect, maintain and subsequently remove Federal Aid construction identification signs at each of the following approximate locations :

1. On the right of Sta. 98+00
2. On the left of Sta. 138+38

Sign details shall be as specified on Standard Drawing FACI-1, "Code N-54(1)-96(2)".

The signs shall be erected in accordance with Standard Drawing FACI-2. Additional requirements shall be in accordance with notes in the proposal.

**PAVEMENT REMOVAL OUTSIDE NORMAL CONSTRUCTION LIMITS:~**

After the existing pavement as indicated on the plans has been removed, the old roadway shall be graded to the level of the surrounding ground, the old ditches filled and the disturbed areas sloped to drain and left in a neat condition ready for seeding. Seeding shall be measured and paid for in accordance with Item 659 Seeding and Mulching. Payment for all other work required shall be included in the unit price bid for Item 202 Existing pavement removed and Item 203 Excavation not including embankment construction.

**MAINTENANCE OF SEWER FLOWS :~** The Contractor shall conduct his operations so as to maintain at all times sewer flows through existing facilities to remain in place and through existing facilities to be replaced until new facilities are completed and placed into use.

Payment for any additional costs involved in maintaining these flows by pumping or by any other means approved by the Engineer shall be included in the unit price bid for the respective items of 603 Conduit.

# GENERAL NOTES

| FED. RD. DIVISION | STATE | PROJECT | |
|---|---|---|---|
| 2 | OHIO | | |

HOL-39-(13.22-13.62)

7/70

CONNECTIONS TO EXISTING PIPE :~ At places where the plans provide for proposed pipe to be connected to existing pipe, it shall be the responsibility of the Contractor to locate the existing pipe both as to line and grade before he starts to lay the proposed pipe. The cost of this operation shall be included in the unit price bid for the pertinent 603 conduit item.

FARM DRAINS :~ All farm drains which are encountered during construction shall be provided with unobstructed outlets under the direction of the Engineer. Existing collectors which are located below the roadway ditch elevations and which cross the roadway shall be replaced within the right-of-way limits by Item 603 Conduit, Type "B" with Class "B" Bedding, one commercial size larger than the existing conduit.

Existing collectors and isolated farm drains which are encountered above the elevation of the roadway ditches shall be outletted into the roadway ditch by 603 Type "F" Conduit. The optimum outlet elevation shall be, if possible, one foot above the flowline elevation of the ditch.

The location, type, size and grade of required replacements shall be determined by the Engineer during construction and payment shall be made on final measurements.

The following estimated quantities have been included in the General Summary for the work noted above :

| | | |
|---|---|---|
| Item 603- | 6" Conduit, Type "B" with Class "B" Bedding | 75 Lin.Ft. |
| Item 603- | 6" Conduit, Type "E" | 400 Lin.Ft. |
| Item 603- | 6" Conduit, Type "F" | 20 Lin.Ft. |
| Item 601, | Dumped Rock Channel Protection | 10 Cu.Yds. |

And necessary Pipe Specials which shall be included for payment in the pertinent conduit item.

None of the above materials shall be ordered by the Contractor until requested by the Engineer.

U.S.C.G.S. BENCH MARKS :~ Bench mark (N&Y258 1959) set in the northwest wingwall of the bridge over Corns Run will be destroyed by construction. The Division Office will furnish a new bronze tablet marked (Y 258 Reset 1968) which will be placed as directed by the Engineer, at the west end of the north headwall, of the proposed culvert located at Sta. 158+52. Accurate levels shall be run between the old and the new bench marks, in two (2) separate runnings. The elevation of the new B.M. shall be established and reported to the Division Location and Design office on special forms to be furnished by them. The old B.M. shall be destroyed and the bronze tablet removed and returned with the report to Location & Design.

The U.S.C.G.S. bench mark (D 259 1959) located in the west quadrant of the Twp. Rd. 315 Junction with existing S.R. 39 and bench mark (Z 258 1959) set in the north headwall of a culvert located 0.1 mile easterly along existing S.R. 39 from the Junction of Twp. Rd. 315 shall be left in place. The Contractor shall use extreme caution when removing the pavement, grading and seeding in the area of (Z 258 1959), in order to insure preservation of this bench mark for later resetting along relocated S.R. 39 by U.S.C.G.S. Engineers.

All cost of the above work is to be included in the price bid for Item 604 Monument Reset.

DRAINAGE OF BASE MATERIAL :~ Where the base material is drained by 605 Aggregate Drains, the Contractor shall finish, seed, and mulch the slopes so as not to impede drainage of the base material.

MAINTAINING TRAFFIC :~ The Contractor shall maintain two-way traffic at all times on S.R. 39. At least one-way traffic shall be maintained on all Township Roads. Traffic shall be maintained by use of the existing pavement, the proposed pavement and temporary roadways surfaced with Item 410 aggregate and stabilized with Item 616 calcium chloride.

One-way traffic will be permitted over the grade of the new highway, for minimum periods of time consistent with the requirements of the specifications for protection of completed asphalt concrete courses, during paving operations where construction overlaps existing pavement.

The length of one-way traffic zones shall be kept to a minimum consistent with the requirements of the work. Maximum use shall be made of the existing pavement for traffic maintenance, holding the length and duration of use of temporary traffic lanes to a minimum.

Temporary traffic lanes shall be surfaced with 410 aggregate, treated with 616 calcium chloride and the surface maintained daily in a manner satisfactory to the Engineer. Two-way traffic lanes shall be surfaced with aggregate at least twenty (20) feet wide and one-way traffic lanes shall have the surfacing aggregate not less than twelve (12) feet wide.

Payment for all of the above except for 410 aggregate and 616 calcium chloride shall be included in the price bid for Item 614 Maintaining Traffic.

ITEM 605 AGGREGATE DRAINS :~ Aggregate drains shall be placed at fifty (50) foot intervals on each side of normal crowned sections and at twenty-five (25) foot intervals on the low side only of superelevated sections except where Item 605 Pipe Underdrains have been provided. Additional aggregate drains may be required and shall be constructed at locations determined by the Engineer. An estimated quantity of 4,800 lin. ft. has been included in the General Summary for Item 605. Aggregate Drains

SEQUENCE OF CONSTRUCTION OPERATIONS : The Contractor shall limit his operations during the fall, winter and early spring of 1968-69 so that the existing pavement from Sta. 119+00 to the end of project shall not be disturbed. The existing pavement shall remain in place thruout this period for traffic maintenance, except that enough pavement may be removed at structure locations to permit their construction.

GUARD RAIL, MODIFIED AS PER PLAN

Type 4

All approach (entrance) ends of Type 4 Guard rail shall be constructed with new guard rail approach end assemblies as detailed on Sheet No. 5 unless otherwise shown on the plans. Both ends of all runs of deep beam guard rail shall be constructed with the new approach end assemblies when used on two-lane highways, unless otherwise shown on the plans.

Basis of Payment -

Type 4 guard with post spacing @ 6'-3", spacer blocks & new approach end assemblies, will be paid for as "606 Guard Rail, Type 4 modified as per plan," complete in place

# PAVEMENT CALCULATIONS

ITEM 203 SUBGRADE PREPARATION

9,038.91' x 24.0' ÷ 9 = 24,103.8 Sq. Yds.
Deduct for rock cut 1,650' x 24.0' ÷ 9 = − 4,400.0 Sq. Yds.

TOTAL ITEM 203 = 19,704 SQ. YDS.

ITEM 410 TRAFFIC COMPACTED SURFACE COURSE, TYPE A or B

Estimated Length = 7,000 Lin. Ft.
7,000' x 75 Cu. Yds./100 Lin. Ft. = 5,250 Cu. Yds.
5,250 Cu. Yds. x 25 % = 1,312 Cu. Yds.

TOTAL ITEM 410, TYPE A or B = 1,312 CU. YDS.

ITEM 410 TRAFFIC COMPACTED SURFACE COURSE, TYPE C

5,250 Cu. Yds. x 75 % = 3,938 Cu. Yds.

TOTAL ITEM 410, TYPE C = 3,938 CU. YDS.

ITEM 616 CALCIUM CHLORIDE

5,250 Cu. Yds. x 1 Ton/50 Cu. Yds. = 105 Tons

TOTAL ITEM 616, CALCIUM CHLORIDE = 105 TONS

ITEM 616 WATER

Estimated 60 M-Gals.

TOTAL ITEM 616, WATER = 60 M-GALS.

ITEM 659 COMMERCIAL FERTILIZER

127,075 Sq. Yds. x 20 lbs./1,000 Sq. Ft. x 9 ÷ 2,000 = 11.44 Tons

TOTAL ITEM 659, FERTILIZER = 11.44 TONS

ITEM 659 AGRICULTURAL LIMING

127,075 Sq. Yds. x 100 lbs./1,000 Sq. Ft. x 9 ÷ 2,000 = 57.18 Tons

TOTAL ITEM 659, LIMING = 57.18 TONS

# SOIL PROFILE

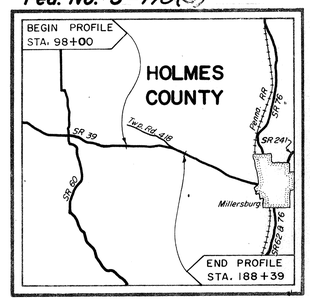
**HOLMES COUNTY**
**HOL – 39 – (13.22 – 1.362)**

OHIO STATE HIGHWAY TESTING LABORATORY
1620 W. BROAD ST. COLUMBUS 23, OHIO

1/5

NOTE: INFORMATION SHOWN BY THIS SUBGRADE PROFILE WAS OBTAINED SOLELY FOR USE IN ESTABLISHING DESIGN CONTROLS FOR THE PROJECT. THE STATE OF OHIO DOES NOT GUARANTEE THE ACCURACY OF THIS DATA AND IT IS NOT TO BE CONSTRUED AS A PART OF THE PLANS GOVERNING CONSTRUCTION OF THE PROJECT.

**Fed. No. S-170(5)**



LOCATION MAP

Recon – J.F.S. – 6/15/67.
Drilling – Auger – L.M.D. – 8/11/67 to 8/18/67.
Drilling – Core – W.F.H. – 8/23/67 to 8/29/67.
Drafting – C.L.I. – 10/19/67.

## GENERAL INFORMATION

### INTRODUCTION

THE PROJECT CONSISTS OF THE ALIGNMENT AND GRADE IMPROVEMENT OF 1.71 MILES OF SR 39, BEGINNING AT EXISTING SR 39, APPROXIMATELY 4 MILES WEST OF MILLERSBURG, EXTENDING EASTWARD AND TERMINATING ON EXISTING SR 39, APPROXIMATELY 2.3 MILES WEST OF MILLERSBURG.

PROPOSED GRADE INDICATES MAXIMUM PROPOSED 32-FOOT CUTS AND 42-FOOT FILL EMBANKMENTS.

### GEOLOGY OF THE PROJECT

THE ALIGNMENT TRAVERSES A DISSECTED PORTION OF THE GLACIATED ALLEGHENY PLATEAU, IN AN AREA WHERE MODERATELY DEEP TO THIN GLACIAL DERIVED SOILS OVERLIE SHALE, SANDSTONE, AND COAL, OF PENNSYLVANIAN AGE.

### EXPLORATION

EXPLORATORY BORINGS WERE MADE BY MEANS OF TRUCK-MOUNTED MECHANICAL SOIL AUGER, HAND AUGER (IN AREAS OF DIFFICULT ACCESS), AND ROTARY-TYPE DRILL RIG, BETWEEN AUGUST 11 AND 29, 1967.

### INVESTIGATIONAL FINDINGS

MATERIALS ENCOUNTERED IMMEDIATELY BELOW PROPOSED GRADE ARE PREDOMINANTLY COMPRISED OF SANDY SILTS (A-4a) AND SILT CLAYS (A-6a), GENERALLY HAVING MOISTURE CONTENTS IN THE LOWER PORTIONS OF THE PLASTIC RANGE, AS WELL AS SHALE AND SANDSTONE BEDROCK.

BEDROCK IS ANTICIPATED IN THE FOLLOWING EXCAVATION AREAS:

BETWEEN STATIONS 123+50 AND 129+50 - SHALE AT GRADE AND IN THE DITCHES AND BACKSLOPES.

BETWEEN STATIONS 128+50 AND 131+00 - SHALE AT GRADE AND IN THE DITCHES.

BETWEEN STATIONS 131+00 AND 140+00 - SANDSTONE AT GRADE AND IN THE DITCHES AND BACKSLOPES.

IN THE EMBANKMENT FOUNDATION AREAS, MATERIALS ARE PREDOMINANTLY COMPRISED OF SANDY SILTS (A-4a), WITH SOME SANDY GRAVELS (A-1-b AND A-2-4) AND SILT CLAYS (A-6a), GENERALLY HAVING LOW MOISTURE CONTENTS AND MOISTURE CONTENTS IN THE LOWER PORTIONS OF THE PLASTIC RANGE.

WET MATERIALS WERE ENCOUNTERED AT STATIONS 158+25, 160+50, AND 175+00.

## LEGEND FOR PROJECT AVERAGE RESULTS OF TESTS — 115 SAMPLES TESTED

- DRIVE SAMPLE AND/OR CORE BORING PLOTTED TO VERTICAL SCALE ONLY.

NOTE: FIGURES BESIDE BORINGS INDICATE WATER CONTENT IN PERCENT. E.G. 15

- ● WATER CONTENT NEARLY EQUAL TO OR GREATER THAN LIQUID LIMIT.
- ⊖ INDICATES A NON-PLASTIC MATERIAL WITH A HIGH WATER CONTENT.
- ——W FREE WATER.
- (X/Y) NUMBER OF BLOWS FOR "STANDARD PENETRATION" TEST. X=NUMBER OF BLOWS FOR FIRST 6 INCHES. Y=NUMBER OF BLOWS FOR SECOND 6 INCHES.

## SUMMARY OF SOIL TEST DATA

NOTE: NP SHOWN IN LIQUID LIMIT AND PLASTICITY INDEX COLUMNS INDICATES THAT THE MATERIAL IS NON-PLASTIC.
*DENOTES TEST SAMPLE TAKEN AT OR NEAR GRADE.
