

CONTRACT OVERVIEW:

The Office of Statewide Planning & Research is seeking a qualified consultant team to assist with the development and implementation of statewide and regional planning projects and programs on a task order basis. The selected team will primarily be responsible for providing support to Ohio's MPO and RTPO regional planning partners with the implementation of continuous, comprehensive and collaborative planning efforts. This includes, but is not limited to, providing assistance with the development of a variety of transportation-related plans, providing on-call support for data analysis and visualization efforts, performing programmatic reviews and assessments, providing research support, travel demand modeling support, and assisting with training and outreach initiatives.

PROGRAMS, OBJECTIVES, & TASKS:**1. Regional Planning Agency Support:**

- Consultant team would provide technical assistance to regional planning organizations, as directed by the Office of Statewide Planning & Research, helping support the 3C planning process and adequately addressing federal requirements. These services would be rendered at a cost to the receiving agency's CPG, STBG, or CMAQ allocations.

2. Provide Technical Assistance & Resource Development:

- Consultant team would provide technical support to regional partners on data analysis, processing, scripting and reporting/visualization services. This could include automation of various workflows and development of performance measures, reporting tools and monitoring systems.

3. Provide Support on Statewide Planning Initiatives:

- Consultant team would provide additional capacity to implement planning projects and studies initiated by the STW Planning section within the office of Statewide Planning and Research. Team would support ODOT in stakeholder engagement efforts and provide a supporting role on plan development tasks where additional needs are identified past defined scope.
