Kevin,

Verizon has cable buried along the East side of US 62. See attachment

**Thank you**

Good Afternoon Mr. Jones

I am providing an electronic format copy of our current plans for the Franklin County FRA-US62-4.90 PID119042. This project in Jackson Township proposes improvement for two drainage systems along US-62.

As per the attached cover letter, it is requested that you review the utility information presented and offer any corrections or omissions which you may recognize on the plans by whatever means works best for you. Your help in getting the most complete information regarding your facilities is much appreciated.

Sincerely,

**Kevin Jones** | Design Engineer - Transportation Department

Good Morning Maurice,

Thank you for the information regarding Verizon Business facilities in the vicinity of proposed work along US-62 south of Grove City. It may not have been clear in the plans, but there are two sites where work is proposed. System A of the plans

is covered by the image you did provide, however System C work begins about 600' northeast of Demorest Drive and is not covered in the provided image. It appears your facilities cross US-62 just south of Demorest Drive in a northwesterly/southeasterly direction (being southeast of US-62 south of the crossing and positioned northwest of the road north of this point). I'd like to request additional information on where your facilities lie north of Demorest Drive as well.

Additionally, are you able to provide any additional details on what offset these lines were placed at with respect to the road or some other point of reference and at what approximate depth?

Thank you in advance for any additional help you're able to provide,

Brady

Hey Maurice,

Thank you for the additional information. One point of clarification I'd like to ask about, is the 8" – 14" accurate?

Verizon fiber is within the ROW of US 62 on the West Side. Depths range between 36"-48".  
EOP range between 8" - 14".

Or was that meant to be 8' – 14'?

Thanks,
