Reviewer's Reasoning for the Recommendation:

The larger parcel before the take is 113.854 gross acres of Rural Residential land. The takings reduce the size of the residue to 109.928 net acres of right residue. There is no adverse effect to the residue property. The take includes vacant land, a dilapidated building and a Temporary Easement for 1.5 years. There is no apparent damage to the residue property, therefore this reviewer recommends the VF appraisal report as the basis for FMVE.

Please note, a R/W Plan revision was made, dated 12/18/20, to relocate the driveway to this parcel further south from the original driveway. A new driveway will be installed as part of the project on SR37, south of the intersection.
