Curtis,
I looked at the bridge, GUE-70-0735, 3001083. Beam #1 in span 2 was hit. There is no structural damage only scraped paint. Photo attached.

Curtis,
I will take a look at it this morning.

Jeff/Albert
Will one of you go look at this bridge.
Thanks
Curtis

Subject: GUE 70 7.354 Bridge Hit

Early Monday morning part of a load being hauled by a commercial vehicle struck the above structure. The damage appears to be only superficial to the paint but I assume you would like to have someone look at it today. The hit is in the EB driving lane. If your guys want to actually get up and look at it we will have to set a lane closure. Please let us know. Thanks!

Thanks,
Mark Atkinson, P.E.
