

ENBRIDGE GAS OHIO

Please be informed that The East Ohio Gas Company's trade name is Enbridge Gas Ohio ("Enbridge")

RESTRICTIONS

On land that Enbridge holds various rights for its Gas Wells, Metering and Regulating facilities, Transmission, Storage, Gathering and/or Distribution Pipelines, based on the rights held by Enbridge, and maintaining compliance with Enbridge Gas Ohio's, State and Federal codes, regulations, and laws.

For Enbridge Gas Ohio's transmission, storage, gathering and distribution pipeline's operating previously or currently at 100 psig or higher (being high pressure pipelines), the EASEMENT area in general is considered to be 60 feet wide, on, over, under and 30 feet on each side of the pipeline(s) centerline, unless specifically defined otherwise. For Enbridge's distribution pipelines operating at less than 100 psig, the EASEMENT area in general is considered to be 20 feet wide, on, over, under and 10 feet on each side of the pipeline(s) centerline, unless specifically defined otherwise. If multiple pipelines exist paralleling each other, the EASEMENT area is increased in width by the distance between the pipelines. Enbridge's EASEMENT area in general is considered to be a 100 foot radius around Enbridge's gas wells and a 100 foot radius around Enbridge's brine/oil tanks. Enbridge's EASEMENT areas for its access driveways to said facilities is considered in general to be 20 feet wide, on, over, under and 10 feet each side of the driveway's centerline.

- 1) Sewer, water, drainage culverts, cable, electric and telephone/communication lines may cross Enbridge's pipeline and driveway easement areas at near right angles, providing that they vertically clear Enbridge's pipeline(s) by a minimum of 12 inches, and be within suitable conduit if it is an underground line carrying an electrical charge, and the installer complies with safe excavation and shoring FED-OSHA 29 CFR Part 1926 Subpart P, and its counterparts, and in accordance with any and all other applicable government codes, regulations, and laws. Unless it's not practical or possible, Enbridge prefers that all such lines cross under its pipelines.
- 2) No lines other than Enbridge's, such as but not limited to, sewer, water, drainage culverts, cable, electric and telephone/communication, may parallel within Enbridge's easement areas or be installed anywhere within Enbridge's gas well or brine/oil tank easement areas.
- 3) No buildings, structures, obstructions (obstructions being anything that impairs Enbridge's use of its easement), or above ground appurtenances (manholes, catch basins, signs, poles, fire plugs, transformers, pedestals, and etc.) may be placed within Enbridge's easement areas, by anyone other than Enbridge.
- 4) Within Enbridge's easement areas the existing grade may be altered by others, providing that the cover upon Enbridge's pipeline(s) is not reduced to less than 36 inches or increased to more than 72 inches, the existing soil conditions are stable, and such alteration of grade would not have an adverse effect upon Enbridge's pipeline(s).
- 5) Adjacent to Enbridge's easement area there shall be no change in grade which would cause Enbridge's easement area to become unstable or affect the lateral or subjacent support of Enbridge's facilities and/or appurtenances.
- 6) Paved driveways or future public and/or private roads may cross Enbridge's pipeline and driveway easement areas at near right angles. Paved parking lots may be placed in Enbridge's pipeline easement areas, providing that there is a means for Enbridge to leak detect its pipelines for its own purposes and in accordance with government codes, regulations, and laws. This might be accomplished by a green space 10 feet wide approximately centered on Enbridge's pipeline(s), or by vents installed according to Enbridge's specifications. Excepting said drive and road crossings, and excepting parking lots, there shall be no macadam, pavement, black top, concrete or other impermeable surfaces placed within the EASEMENT area by anyone other than Enbridge. No such improvements may be made by others within Enbridge's gas well or brine/oil tank easement areas.
- 7) No driveways (including parking lot driveways), roads, or their associated road right-of way, other than Enbridge's, may parallel within Enbridge's easement areas.
- 8) There shall be no impounding of water within Enbridge's EASEMENT area by anyone other than Enbridge.
- 9) There shall be no dumping of debris within Enbridge's EASEMENT area, or placement of fill material that is not acceptable to Enbridge.
- 10) Limited landscaping may be made within the easement areas. If any party questions what would be acceptable to Enbridge, they should contact Enbridge prior to making any such landscape improvement.
- 11) In the case of new development or improvements to existing roads within Enbridge's easement areas, the developer shall prepare Plan, Profile and Cross Section plans of the improvements, showing Enbridge's pipeline(s) plus existing and proposed grade, sewers, utilities, road improvements, etc. for Enbridge to review. For new construction any violation of these restrictions will be subject to denial of gas service. No construction on such improvements may begin until Enbridge has provided written approval to the developer.

All improvements made within the easement areas by parties other than Enbridge will be considered encroachments. Such improvements would be done at the risk and peril of the developer, owner of the facility, and/or landowner, and said parties shall be liable to Enbridge for any damage or loss to Enbridge's facilities caused by such improvements. Moreover, Enbridge reserves its rights at any time, without notice, and without permit to remove any encroachments from within its easement areas to facilitate maintaining, operating, replacing, adding to, or etc. its facilities and/or appurtenances; and Enbridge will not be liable to replace or compensate any party for damages Enbridge inflicted upon any encroachment. To have the on-site location of any Enbridge pipeline marked for any reason, call 8-1-1 or 1-800-362-2764.

*Inquiries or questions pursuant to Gas Wells, Transmission, Storage, Gathering, and/or Distribution pipelines should be directed in writing to **Enbridge Gas Ohio, Engineering Department, 320 Springside Drive, Akron, OH 44333** or via email to relocation@enbridge.com.*

Ohio Law (ORC – 3781.28 A & B) requires all parties to contact OHIO811 by dialing 8-1-1 or 1-800-362-2764 at least 48 hours but not more than 10 working days before digging or excavating.
