Re: A218903183

ATTN: TREY JACKSON

In response to your request for information (A218903183) about Duke Energy electric and gas facilities, the Company underground records have been reviewed and information is supplied as noted below.

We have attached a copy of our gas facility maps for the vicinity of your project area. It is your responsibility to locate our gas facilities on your plans.

We have attached a copy of our underground electric records for the vicinity of your project area. It is your responsibility to locate our electric facilities on your plans.

Underground electric service conductors (Service Laterals) are located between our poles or electric underground facilities and the metering facilities on the customer's premise. The customer furnishes, installs, and maintains the entire customer owned electric underground service lateral. We have no records as to the size, type of conductor, depth or exact location. Therefore, it is essential that you identify any of the customer-owned electric service laterals and make arrangements for their relocation with the responsible party. Subsequent relocation of our facilities for highway improvements or the installation of other utilities may require the customer to replace, relocate or reconstruct the service lateral at their expense. Above ground electric facilities can be determined by field survey.

Based upon Ohio Revised Code Section 153.64, it is the responsibility of the public authority sponsoring the public improvement to plot overhead and/or underground facilities on their plans and to notify the respective utility of any conflicts.

To secure the locating and marking of underground electric and gas facilities in your project area, you (or your contractor) must call the Ohio Utilities Protection Service, at 811, at least two (2) working days before you dig.

These documents were not prepared by a land surveyor, and should not be used for any survey, engineering, or legal purposes. All facility lines and equipment locations are approximate. The information on this document does not include secondary services. Equipment owned by others or other utility infrastructure may be otherwise incomplete.

For additional information concerning our facilities, please contact:

- Gas Records Department at OH/KYHouseBill@duke-energy.com
- Electric Records Department at (513) 458-3804

Sincerely,

Gordon Thompson
