RE: HAN 75-14.39/ 75-1 Estimate
PID 87005

Mr. Jeff Meyers:

The Ohio Department of Transportation has received your 75-1. We have agreed to your relocation plans and to the total number of poles affected by this project. However, we have some disagreement on the number of poles that are reimbursable. As we discussed during our meeting with Ken Prince, **ODOT is granting you the authorization to proceed with the relocation work.** However, until ODOT Central Office Real Estate/ Utilities and AEP can agree on the number of poles that are reimbursable, ODOT cannot agree to a dollar amount or the percent of participation. Please start your relocation work and have it completed by the utility clear date of **December 31, 2016.**

This letter serves as your permit for any relocation work for this project.

Respectfully,

Kirk Slusher, P. E.
District Deputy Director
