RE: HAN -75-14.39 PID 87005  
Findlay Woodcock 69Kv Line  
Harrison Street and Morrival Blvd.

Dear Miss Smith:

Relocation plans for the above referenced project have been reviewed by the Ohio Department of Transportation and were determined to meet/exceed minimal requirements to clear the project for construction. Any future need to perform additional work on the facility to allow this project to proceed unimpeded will remain the responsibility of the utility owner. Therefore, this letter is your authorization including permit approval from the Ohio Department of Transportation to proceed with necessary relocation work.

Please notify this office three days in advance of your actual starting date in order to insure that our Construction Department will be advised of need for an inspector. Non-compliance in meeting established target dates could cause ODOT to incur project delays and/or additional cost. In this regard, 5515.02 ORC gives the department the authority to ensure project clearance and recover costs. **The relocation must be complete by October 31, 2015**

It is understood that this work will be financed **100%** by American Electric Power.

Respectfully,

*Duane Hackworth*

Kirk M. Slusher  
District Deputy Director
