Toledo, OH 43604

RE: HAN 75-14.39 PID 87005

US 68/15 Lima Ave.: Joint Trench with Time Warner Cable & Buckeye Cable

Dear Mr. Fey:

Relocation plans for the HAN 75-14.39 /68/15 Lima Ave. as part of the above referenced project have been reviewed by the Ohio Department of Transportation and were determined to meet/exceed minimal requirements to clear the project for construction. Any future need to perform additional work on the facility to allow this project to proceed unimpeded will remain the responsibility of the utility owner. Therefore, this letter is your authorization including permit approval from the Ohio Department of Transportation to proceed with necessary relocation work.

Please notify this office three days in advance of your actual starting date in order to insure that our Construction Department will be advised of need for an inspector. Non-compliance in meeting established target dates could cause ODOT to incur project delays and/or additional cost. In this regard, 5515.02 ORC gives the department the authority to ensure project clearance and recover costs. **The relocation must be complete by December 31, 2016.**

It is understood that this work will be financed **100%** by AT&T.

Respectfully,

Kirk M. Slusher  
District Deputy Director
