LIMITED ACCESS

This improvement is especially designed for through traffic and has been declared a limited access highway or freeway between Station 30+00.65 and Station 337+69 by action of the Director of Highways in accordance with the provisions of Section 5511.02 of the Revised Code of Ohio.

LINE DATA

Begin Project Sta. 30+00		
End Project Sta. 431+00		
Gross Length Project	40,100.00 Lin. Ft.	
Deduct for R.R. Crossing	31.97 Lin. Ft.	
Net Length of Project	40,068.03 Lin. Ft.	or 7.588 Miles
Begin Work Sta. 28+50		
End Work Sta. 432+36		
Total	40,386.00 Lin. Ft.	
Add for Approaches S.R. 310 (120-306)	426.00 Lin. Ft.	
Gross Length Work	40,812.00 Lin. Ft.	
Deduct for R.R. Crossing	31.97 Lin. Ft.	
Net Length Work	40,780.03 Lin. Ft.	or 7.723 Miles

LICKING COUNTY
Sec. LIC-161-5.12 – LIC-37-15.09
Date of Letting 1956
Contract No.

The Standard Specifications of the State of Ohio Department of Highways, including changes and supplemental specifications listed in the proposal, shall govern this improvement.

I hereby approve these plans and declare that the making of this improvement will require the closing of a portion of the highway to traffic, except as noted on sheet 5, and that detours will be provided as indicated on the plans. Provisions for the maintenance and safety of traffic on the remaining portions of the highway will be as set forth on the plans and estimates.

The Right of Way necessary for this improvement will be provided by the State of Ohio.

Approved Oscar F. Schilling

GENERAL NOTES

DESIGN SPEED

THE DESIGN SPEED IS 60 M.P.H.

UTILITIES

ANY AND ALL WORK FOR PUBLIC OR PRIVATE UTILITIES SHALL BE DONE BY AND AT THE EXPENSE OF THEIR RESPECTIVE OWNERS.

TELEPHONE: NEWARK TELEPHONE CO., NEWARK, OHIO
NEW YORK CENTRAL RAILROAD CO., NEWARK, OHIO
CENTRAL TELEPHONE CO., ALEXANDRIA, OHIO

ELECTRIC: COLUMBUS, SOUTHERN POWER CO., COLUMBUS, OHIO
OHIO POWER CO., NEWARK, OHIO

GAS: OHIO FUEL GAS CO., COLUMBUS, OHIO
PURE TRANSPORTATION CO., DAYTON, OHIO

WATER: VILLAGE OF GRANVILLE

SANITARY SEWER: DENISON UNIVERSITY, GRANVILLE, OHIO

FIELD OFFICE

THE CONTRACTOR SHALL PROVIDE A SUITABLE FIELD OFFICE IN ACCORDANCE WITH SEC. S-0.01 (b) HAVING A MINIMUM FLOOR SPACE OF 250 SQ.FT. THE CONTRACTOR SHALL HAVE A TELEPHONE INSTALLED AND MAINTAINED IN THIS OFFICE DURING THE CONSTRUCTION OF THIS PROJECT.

REMOVALS

ALL ITEMS MARKED FOR REMOVAL SHALL BECOME THE PROPERTY OF THE CONTRACTOR UNLESS OTHERWISE NOTED, AND SHALL BE DISPOSED OF BY HIM. WHERE PIPE IS MARKED FOR REMOVAL AND HEADWALLS OR CATCH BASINS ARE INVOLVED, THE COST OF REMOVAL AND DISPOSAL OF THE HEADWALLS OR CATCH BASINS SHALL BE INCLUDED IN THE UNIT PRICE BID FOR ITEM E-12 "PIPE REMOVED".

PAVED OR SODDED DITCHES

PAVED OR SODDED DITCHES HAVE BEEN PROVIDED FOR ALL OPEN WATERWAYS WHERE EROSION MAY OCCUR. THE ENGINEER MAY MAKE MINOR RELOCATIONS OF THE SOD OR PAVED DITCHES SHOWN ON THE PLANS OR HE MAY OMIT THIS CONSTRUCTION IF CONDITIONS ENCOUNTERED WARRANT SUCH ACTION.

AN ADDITIONAL AMOUNT OF SODDING AND PAVED GUTTER, TYPE I, DETAILED ON SHEET 4 IS PROVIDED FOR USE AT LOCATIONS, AS DIRECTED BY THE ENGINEER, WHERE EROSION MIGHT OCCUR ON BACKSLOPES OR WHEREVER HE MAY DEEM NECESSARY. PAYMENT FOR ALL SODDING AND PAVED GUTTER SHALL BE MADE ON FINAL MEASUREMENT AT THE UNIT PRICE BID FOR THE RESPECTIVE ITEMS.

ESTIMATE 400 SQ. YDS. OF SODDING AS PER PLAN ADDITIONAL AND 200 LIN.FT. OF PAVED GUTTER TYPE I ADDITIONAL WILL BE REQUIRED TO PROTECT AREAS SUBJECT TO EROSION.

FILLING MAJOR DEPRESSIONS

ANY MAJOR DEPRESSIONS IN THE EXISTING PAVEMENT, WHERE RESURFACING AND WIDENING IS INDICATED, SHALL BE FILLED AND COMPACTED WITH BITUMINOUS CONCRETE LEVELING MATERIAL IN ADVANCE OF PLACING THE REGULAR LEVELING COURSE. THESE DEPRESSIONS SHALL BE FILLED IN LAYERS NOT TO EXCEED THREE INCHES IN DEPTH WHEN COMPACTED.

PROFILE

THE PROFILE OF THE PROPOSED SURFACE COURSE, WHERE WIDENING AND RESURFACING IS INDICATED, SHALL BE APPROXIMATELY 3½" TO 6" ABOVE THAT OF THE EXISTING PAVEMENT AS INDICATED ON THE TYPICAL SECTIONS EXCEPT WHERE OTHERWISE SHOWN ON THE PLANS.

EXCESS EXCAVATION

ANY EXCAVATION IN EXCESS OF THAT REQUIRED TO COMPLETE THE EMBANKMENT FOR THE LANES BEING CONSTRUCTED AT THIS TIME SHALL BE PLACED IN THE EMBANKMENT AREAS OF THE FUTURE LANES AT LOCATIONS APPROVED BY THE ENGINEER. PLACEMENT AND METHODS SHALL BE IN ACCORDANCE WITH SEC. E-1.08. EMBANKMENT SO PLACED SHALL BE SEEDED IN CONFORMANCE WITH ITEM L-9 AND THE SEEDING SHALL BE PAID FOR AT THE UNIT PRICE BID PER SQ.YD. FOR ITEM L-9 "SEEDING AND PROTECTING". NO UNSUITABLE MATERIAL SHALL BE DISPOSED OF WITHIN THE AREA OF THE FUTURE EMBANKMENT.

RAILROAD CROSSING

THE CROWN SHALL BE WORKED OUT OF THE PAVEMENT EACH SIDE OF THE RAILROAD CROSSING AS DETAILED ON THE CROSS SECTIONS AND AS NOTED ON SHEET NO. 35.

PREPARATION OF AREAS TO BE SODDED

THE COST OF EARTHWORK NECESSARY TO ACCOMPLISH THE PREPARATION OF AREAS TO BE SODDED IS INCLUDED IN UNIT PRICE BID PER SQ.YD. OF SOD. COMMERCIAL FERTILIZER (10-6-4) SHALL BE APPLIED AT THE RATE OF 20 LBS. PER 1000 SQ.FT. OF AREA AND AGRICULTURAL LIMING MATERIALS SHALL BE APPLIED AT THE RATE OF 100 LBS. PER 1000 SQ.FT. OF AREA. BOTH SHALL BE WORKED INTO THE SOIL PRIOR TO LAYING THE SOD. THE SOD BED SHALL HAVE TWO INCHES OF LOOSE SOIL ON WHICH SOD IS LAID AFTER EXCAVATION FOR SOD THICKNESS.

~~SUBGRADE COMPACTION~~

~~THE SUBGRADE UNDER PAVED DRIVES [illegible] SHALL BE COMPACTED TO A DEPTH OF SIX INCHES TO THE DENSITY REQUIREMENTS IN TABLE III, ITEM E-1. PAYMENT FOR SUBGRADE COMPACTION UNDER PAVED DRIVES AS SPECIFIED ABOVE SHALL BE INCLUDED IN THE UNIT PRICE BID FOR ITEM E-1 "ROADWAY EXCAVATION".~~

I-18 STABILIZED CRUSHED AGGREGATE SHOULDERS AND APPROACHES, AS PER PLAN

ALL PROVISIONS OF ITEM I-18 SHALL BE MET EXCEPT THE USE OF CRUSHED SLAG OR GRAVEL WILL NOT BE PERMITTED. AGGREGATE MEETING THE REQUIREMENTS OF CRUSHED LIMESTONE SHALL BE USED.

SEEDING AND PROTECTING

QUANTITIES FOR SEEDING ARE CALCULATED FOR THE SOIL AREAS BETWEEN LINES TEN FEET OUTSIDE THE CONSTRUCTION LIMITS AS SHOWN ON THE CROSS SECTIONS OR TO THE RIGHT-OF-WAY LINE IF SUCH LINE IS LESS THAN 10 FEET FROM THE CONSTRUCTION LIMITS. SEEDING IS CALCULATED FOR CHANNEL CHANGE AREAS FROM A POINT TWO FEET ABOVE NORMAL WATER LINE TO A POINT 10 FEET OUTSIDE THE CONSTRUCTION LIMIT AS DETAILED ON THE PLANS.

ALL AREAS OUTSIDE THESE LIMITS WHERE THE VEGETATIVE GROWTH HAS BEEN INJURIOUSLY DISTURBED OR DESTROYED BY THE CONTRACTOR SHALL BE RESTORED AND SEEDED IN CONFORMANCE WITH THE PROVISIONS OF ITEM L-9 BY THE CONTRACTOR AT HIS OWN EXPENSE.

SUPERELEVATION

SUPERELEVATED CURVES SHALL BE BUILT WITHOUT CROWN. THE CROWN SHALL BE WORKED OUT OF THE PAVEMENT IN THAT PORTION BETWEEN THE BEGINNING OF THE TRANSITION AND THE POINT WHERE THE SUPERELEVATION EQUALS TWICE THE CROWN.

DRIVE LOCATIONS

ANY DRIVE LOCATED OUTSIDE OF THAT PART OF THIS PROJECT WHICH HAS BEEN DECLARED "LIMITED ACCESS", MAY BE RELOCATED AT THE DIRECTION OF THE ENGINEER PROVIDING THE RELOCATION CAN BE MADE AT NO ADDITIONAL COST TO THE STATE.

EXISTING PAVEMENT

ALL AREAS PAVED WITH BITUMINOUS MATERIAL OVER WHICH EMBANKMENT IS TO BE PLACED SHALL BE SCARIFIED PRIOR TO PLACEMENT OF THE EMBANKMENT, WITH PAYMENT THEREFOR INCLUDED IN THE UNIT PRICE BID FOR ITEM E-1 "ROADWAY EXCAVATION". PAVED AREAS OUTSIDE OF THE CONSTRUCTION LIMITS, WHEN DESIGNATED FOR REMOVAL, SHALL BE REMOVED FOR THE FULL DEPTH OF THE BITUMINOUS MATERIAL. THESE AREAS SHALL THEN BE SCARIFIED, LEVELED TO ELIMINATE TRENCH SCAR, AND SEEDED. PAYMENT FOR THESE OPERATIONS, EXCEPT SEEDING, IS INCLUDED IN THE UNIT PRICE BID FOR ITEM E-8 "REMOVAL AND DISPOSAL OF EXISTING PAVEMENT". PAVEMENT REMOVED, UNLESS OTHERWISE INDICATED, IS INCLUDED IN E-1 "EXCAVATION".

T-30 PRIME COAT

BITUMINOUS PRIME COAT, ITEM T-30, IS CALLED FOR OVER THE EXISTING SURFACE IN SALVAGE AREAS ON S.R. 161. THE ENGINEER MAY OMIT OR DECREASE THE RATE OF APPLICATION OF THE BITUMINOUS MATERIAL IF THE BITUMINOUS CONTENT OF THE SURFACE WARRANTS IT AT THE TIME OF CONSTRUCTION. PAYMENT SHALL BE ON FINAL MEASUREMENT.

DUMPED ROCK FILL AS PER PLAN

ALL DUMPED ROCK USED AS CHANNEL, DITCH OR SLOPE PROTECTION SHALL BE UNIFORMLY PLACED TO GRADE AND CROSS SECTION SHOWN ON PLANS. AT LEAST FIFTY (50) PERCENT OF THE VOLUME SHALL CONSIST OF PIECES WEIGHING AT LEAST SEVENTY-FIVE (75) LBS. EACH. MAXIMUM SIZE OF STONE AS SPECIFIED UNDER I-10.03 MAY BE WAIVED PROVIDED THE STONES ARE PLACED IN A MANNER SUCH THAT THE SURFACE CONFORMS SUBSTANTIALLY TO GRADES AS SHOWN ON THE PLANS.

E-9 REMOVAL OF TREES AND STUMPS

PAYMENT FOR REMOVAL OF TREES AND STUMPS SHALL BE BY LUMP SUM FOR ALL TREES AND STUMPS DESIGNATED FOR REMOVAL BY THE ENGINEER WITHIN THE AREAS REQUIRED BY THESE PLANS. NO ADDITIONAL COMPENSATION WILL BE ALLOWED.

THE ESTIMATED NUMBER OF TREES AND STUMPS TO BE REMOVED, LISTED BELOW, WAS ARRIVED AT BY DILIGENT EFFORT, BUT THE STATE DOES NOT GUARANTEE THE ACCURACY THEREOF. SEE SHEET Nº 38 FOR TREES REQUIRING AGGREGATE FOR ROOT AERATION.

TRAFFIC:

ATTENTION IS INVITED TO THE FACT THAT BETWEEN STATIONS [illegible] AND 336+75 THE CONTRACTOR SHALL MAINTAIN LOCAL TRAFFIC AND TIME BETWEEN OPERATIONS SHALL BE A DETOUR, SHOWN ON SHEET 1, HAS BEEN PROVIDED TO CARRY THROUGH TRAFFIC AROUND THE PROJECT TO STA. 392+75. THE DETOUR SHALL NOT BE PLACED INTO EFFECT PRIOR TO APRIL 1, 1957, UNLESS OTHERWISE APPROVED IN WRITING BY THE DIRECTOR. UNTIL THE DETOUR IS PLACED INTO EFFECT, TWO-WAY TRAFFIC SHALL BE MAINTAINED AT ALL TIMES. THEREAFTER, TRAFFIC SHALL BE MAINTAINED BETWEEN STA. 392+75 AND STA. 432+36.

IN ORDER TO CARRY LOCAL TRAFFIC, THE CONTRACTOR SHALL CONSTRUCT A TEMPORARY RUNAROUND ROAD, BETWEEN STATION 28+50 ON S.R. 161 AND STATION 1+00 RT. OF S.R. 310, AS DESCRIBED UNDER GENERAL NOTE ENTITLED "S-15 TEMPORARY RUNAROUND AS PER PLAN.

ALL LOCAL TRAFFIC BETWEEN STATION 36+74 (S.R.310) AND STATION 392+75 (S.R.37) SHALL BE MAINTAINED AS PER SEC. G 4.05, USING TRAFFIC COMPACTED SURFACE COURSE AND CHLORIDE AS DIRECTED BY THE ENGINEER. PAYMENT FOR MATERIALS SO USED SHALL BE AT THE UNIT PRICE BID. THE CONTRACTORS ATTENTION IS FURTHER INVITED TO THE MAINTENANCE OF LOCAL TRAFFIC WHILE CONSTRUCTING BRIDGES. NO EXISTING STRUCTURE OR ANY PORTIONS OF THE EXISTING HIGHWAY, THE REMOVAL OF WHICH WOULD IMPEDE LOCAL TRAFFIC SHALL BE MADE UNSAFE FOR TRAVEL UNTIL A TEMPORARY STRUCTURE OR TEMPORARY TRAFFIC LANE, ACCEPTABLE TO THE ENGINEER IS IN PLACE. EVERY EFFORT SHALL BE MADE TO AVOID TEARING UP PORTIONS OF THE EXISTING SURFACE FAR IN ADVANCE OF COMPLETING THE WORK IN THE AREA OR DURING INCLEMENT WEATHER. IN ANY CASE THE CONTRACTOR SHALL NOTIFY THE ADJACENT PROPERTY OWNER REGARDING A PROPOSED TEMPORARY TRAFFIC LANE.

BETWEEN STATION 392+75 AND THE END OF PROJECT, THE CONTRACTOR SHALL MAINTAIN TWO-WAY TRAFFIC AT ALL TIMES EXCEPT WHILE PLACING T-35 SURFACE AND LEVELING COURSES AT WHICH TIME ONE-WAY TRAFFIC MAY BE MAINTAINED CONSISTENT WITH THE REQUIREMENTS OF T-35.23 AND B-35.25.

TEMPORARY TRAFFIC LANES SHALL BE CONSTRUCTED ON THE LEFT, MAKING MAXIMUM USE OF THE EXISTING PAVEMENT, AS SHOWN ON THE CROSS SECTIONS. ALL CONSTRUCTION SHALL THEN BE COMPLETED ON THE RIGHT EXCEPT THE RESURFACING.

TRAFFIC SHALL THEN BE PLACED ON THE RIGHT BERM AND PAVEMENT AS SHOWN ON THE CROSS SECTIONS WHILE WORK IS COMPLETED ON THE LEFT.

TRAFFIC COMPACTED SURFACE COURSE AND CALCIUM CHLORIDE HAVE BEEN SET UP FOR USE AS DIRECTED BY THE ENGINEER IN MAINTAINING LOCAL TRAFFIC AND TO MAINTAIN TWO-WAY TRAFFIC BETWEEN STA. 392+75 AND END OF PROJECT AS DESCRIBED ABOVE.

T-10 TRAFFIC COMPACTED SURFACE COURSE, 1000 CU.YDS.

T-10 TRAFFIC COMPACTED SURFACE COURSE, AS PER PLAN, 1000 CU.YDS.

M-10 CALCIUM CHLORIDE, 40 TONS.

PAYMENT FOR CONSTRUCTION, MAINTENANCE AND REMOVAL, WHERE REQUIRED, OF TEMPORARY TRAFFIC LANES OTHER THAN S-15 ITEMS AND EXCEPT FOR FURNISHING AND PLACING ITEMS T-10 AND M-10, IS INCLUDED IN THE LUMP SUM BID FOR "MAINTAINING TRAFFIC."

THESE METHODS OF HANDLING TRAFFIC MAY BE VARIED AT THE DIRECTION OF THE ENGINEER PROVIDING THERE IS NO ADDITIONAL INCONVENIENCE TO THE TRAVELING PUBLIC AND NO ADDITIONAL COST TO THE STATE.

GENERAL NOTES CONTINUED ON SHEET Nº 6

GENERAL NOTES
(CONTINUED FROM SHEET 5)

S-15 TEMPORARY RUNAROUND AS PER PLAN :~
The item S-15 Temporary Runaround as per plan shall consist of the constructing, maintaining and the removing as described below, of a temporary runaround road between Station 28+50 on S.R.161 and 1+00 Right on S.R. 310. Line and grade shall be as shown on the plan and profile sheets and cross sections for the area. The surface shall be 22 ft. wide on a roadway of 26 ft. and shall be Type "B" as described in Item S-15. All provisions of S-15 shall apply except that no temporary bridge is involved. Two temporary culverts will be needed as shown on Sheet Nº. 12 and the cost of their installation and removal shall be included in the lump sum bid for the Item S-15 Temporary Runaround as per plan.
When no longer needed to maintain traffic the **temporary pavement** shall be removed, the embankment sloped to drain, and the entire area seeded as per Item L-9.12. The seeding shall be paid for at the unit price bid per sq. yd. for Item L-9 Seeding and Protecting.

TRAFFIC COMPACTED SURFACE COURSE AS PER PLAN :~
All provisions of T-10 shall apply except that Nº.3 or Nº.34 aggregate shall be used, or the present wearing course may be removed, except in areas where salvage is specified, and used as T-10 modified on the temporary traffic lanes. The material from the present pavement may be used without further tests for gradation or quality. Payment shall be at the unit price bid per cu. yd. for Item T-10 Traffic Compacted Surface Course, as per plan. Measurement of old pavement so used may be by weight or by volumetric means approved by the Engineer. No removals of the existing surface shall be made which would impose additional inconvenience on abutting property owners or the traveling public. Areas where removal of the existing surface for use as T-10 Modified is proposed shall be approved by the Engineer before any removal is accomplished.

B-20 WATERBOUND MACADAM BASE COURSE AS PER PLAN :~
All provisions of Item B-20 shall apply except that Nº. 2 Stone only shall be used for coarse aggregate.

EXISTING PIPES :~
The location and sizes of existing pipes are shown as accurately as available information will permit. The State, however, will not be responsible for variations found during construction.
Drain tile encountered in areas where excavation is indicated shall be outletted into the nearest roadside ditch, but in no case, shall any sanitary sewage be outletted into the roadside ditches. Care shall be exercised by the contractor to avoid undue damage to existing pipe lines.
The following quantities and sizes of I-3 "Roadway Drainage" pipe have been provided to be used as outlets for drain pipes encountered.
4"-200 lin.ft. 6"-200 lin.ft. 8"-200 lin.ft. 10"-200' lin.ft. 12"-200 lin.ft.
The use shall be as directed by the Engineer and payment shall be on final measurement.

I-9 STONE UNDERDRAIN Nº. 2 :~
Stone Underdrains Nº. 2 shall be placed in all locations where I-4 Pipe Underdrains are not specified. Stone underdrains shall be placed as detailed on Sheet Nº. 4. An estimated amount of I-9 required, together with the length needed for the various berm width and ditch slopes is also shown on Sheet Nº. 4. However, the Engineer may vary locations or place additional underdrains to meet conditions encountered during construction. Payment shall be made on final measurement.
The outlets of all stone underdrains shall be cleaned of all straw or loose earth after the placing of materials required for the completion of Item L-9 "Seeding and Protecting". Payment for cleaning the outlets shall be included in the price bid per sq. yd. for Item L-9, "Seeding and Protecting".

UTILITY POLES :~
Attention of the contractor is called to the fact that between Station 391+98.3 and Station 431+00 on the Left and between Station 394+25 and Station 431+00 on the Right, work is being performed outside the existing right-of-way in areas covered by work agreements obtained by the State Highway Department. It will be necessary for the contractor to work around existing poles and to cooperate closely with the utility companies in these areas. The requirements of Sec. E-1.08(g) in areas inaccessible to a roller shall be waived, unless otherwise directed by the Engineer, when compaction operations are being carried on adjacent to poles in the above work agreement areas.

CONNECTION OF PRIVATE DRAINS TO STORM SEWERS OR ROADWAY DRAINAGE :~
The contractor shall not connect to any storm sewer placed under this contract, pipes or drains from a house or other building, septic tank, or filter bed unless the property owner has received a permit or other written statement from the Licking County Health Department to the effect that the drain is free from any contamination or objectionable wastes. It shall be the responsibility of the contractor to advise the Engineer of such drains as they may be encountered during construction. Where directed, the contractor shall plug the tile ends with concrete, payment for which shall be included in the unit price bid for Item E-1, Roadway Excavation. An inspection well as per the detail on these plans shall be constructed at each pipe or drain connected to any storm sewer or roadway drainage pipe.

FILLING BASEMENTS & REMOVING EXISTING FOUNDATIONS :~
All abandoned dug wells, basements or foundations lying within the Right-of-Way or work agreement areas shall be either removed or filled to the level of the surrounding ground, and the area seeded as described below. Cost of well removal and backfilling shall be included in the price bid per Cu. Yd. for Item E-1 Excavation. The cost of seeding shall be paid at the unit price bid per sq. yd. for Item L-9 Seeding and Protecting.
Stone or masonry which protrude above the surrounding ground shall be removed to a depth of two feet below the finished grade and the entire area shall be backfilled to the original ground level in accordance with Sec. E-1.08.
After basement, septic tank or cesspool walls have been removed to two feet below ground, the entire basement, tank or vault shall be backfilled as per Sec. E-1.08 and the area shall then be seeded.

CONSTRUCTION LAYOUT STAKES:
See note in proposal describing the work included in this Lump Sum pay item.

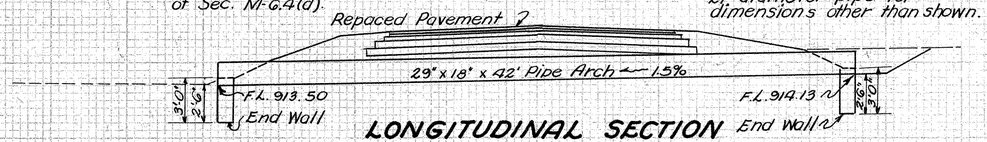
CULVERT DATA

TYPE Metal Arch with integral Base Std. Drwgs. S-27 P.C.-3 & 4
SIZE 29" x 18" x 42'
WORK REQ-Install Culvert and replace pavement as shown. Metal arch to be paved bituminous coated in accordance with the requirements of Sec. M-6.4(d).

NOTE: End walls to be as shown in Standard Construction Drawings S-27 P.C. 4 for a 27" diameter pipe for dimensions other than shown.



LONGITUDINAL SECTION

NOTE: Cost of removing the existing pavement shall be included in price per unit bid for Item E-2 Excavation for Structure. Pavement replacement shall be the courses as shown on the Typical Section for new pavement.

CULVERT DATA

TYPE :~ Corrugated Metal Arch Std. Drwg. (S-27, PC.3) SP-53
SIZE :~ 72"x44"x30'
WORK REQUIRED :~ Install culvert and construct endwalls as shown.

Culvert to be Corrugated Metal Arch with Integral Base (M-6.4(i)) and is paved in accordance with requirements of M 6-4(d).

Excavate inlet & outlet channels.

Place dumped rock fill at upper end of inlet channel.

Remove top portion of existing structure and backfill as per Sec. E-2.08. Cost of backfilling included in item "E-1, Roadway Excavation" for payment.

CULVERT DATA

TYPE: Pipe Culvert Std. Drwg. SP53
SIZE: 100' Cattle Pass
WORK REQUIRED: Excavate inlet and outlet channel, place dumped rock fill, and install cattle pass as per plan. Payment for removal of existing 36"x60.4' Corrugated Metal Pipe to be included in E-3 Channel Excavation.

Note:
Cattle pass pipe for the structure shall meet the requirements for the alternate design B-2, A-3, C-1 as shown on Sheet Nº 215.

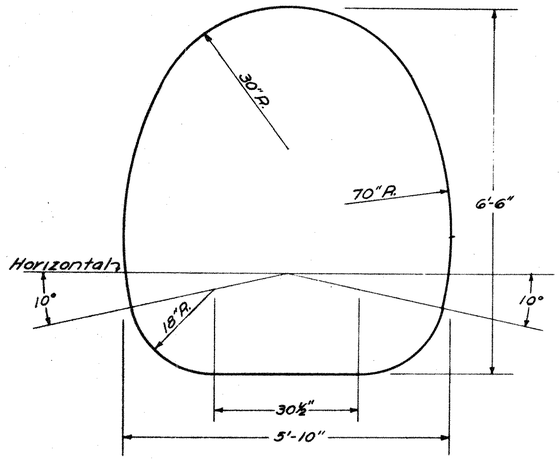
PIPE CATTLE PASS STRUCTURES

When a pipe cattle pass structure is specified, either of the alternates shown hereon may be used. The design shall be in accordance with the appropriate table giving effect to the cover over the top of the pipe.

ALTERNATE "A"



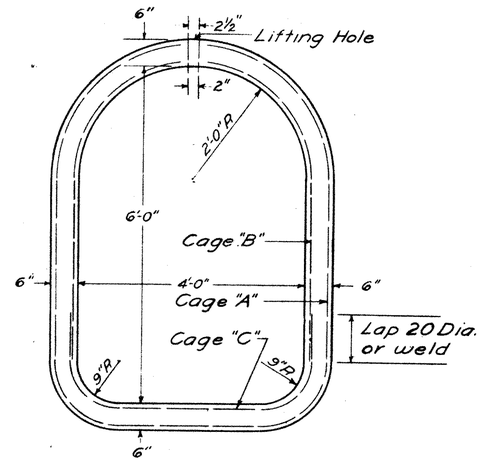
SECTION
SECTIONAL CORRUGATED METAL PIPE ARCH
scale ¾" = 1'-0"

If alternate "A" cattle pass structure is used, materials and construction shall be in accordance with Section M-6.4(g), standard drawing SP-53 and Item S-28, except that the structure shall be measured and paid for as Item S-27. The pipe shall be paved in accordance with Section M-6.4(e).

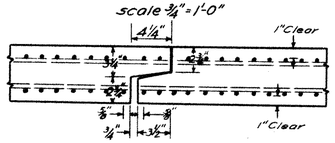
DESIGN	COVER	GAGE *
A-1	2'-3'	8-7
A-2	3'-10'	10-8
A-3	10'-12'	8-7
A-4	12'-14'	7-5
A-5	14'-16'	5-3
A-6	16'-18'	1-1

* The first number indicates the gage of all plates except the bottom and corner plates. The second number indicates the gage of bottom and corner plates.

ALTERNATE "B"



SECTION
scale ¾" = 1'-0"



JOINT DETAIL
scale 1½" = 1'-0"

4'×6' REINFORCED CONCRETE PIPE

All splices in cage "A" shall be welded or have 20 bar diameters lap for deformed bars and 40 bar diameters lap for wire.

Minimum steel requirements are listed below.

Materials, design and manufacturing methods shall meet the requirements of Sec. M-6.6, Reinforced Concrete Pipe, except as otherwise noted. Concrete stresses shall have a minimum ultimate compressive value of 4500 lbs. per sq. in. Sections of pipe shall have a minimum length of four feet.

DESIGN	COVER ft.	STEEL AREA PER FT. OF PIPE IN SQ. IN.		
		Cage "A"	Cage "B"	Cage "C"

GENERAL NOTES

REFERENCES: Reference shall be made to Standard Drawings A-1-54, revised 12-1-54, and CS-1-54, revised 7-16-56, except that the M-bar and N-bar designations shall be changed such that MA and NA bars shall be placed in the west end span, MB and NB bars shall be placed in the center span and MC and NC bars shall be placed in the east end span.

DESIGN SPECIFICATIONS: This structure conforms to the requirements of "Design Specifications for Highway Structures" of the State of Ohio, Department of Highways, dated 10-1-51, together with revisions thereof dated 7-15-52, 4-1-54 and 2-1-55.

REMOVAL OF EXISTING STRUCTURE: When no longer needed to maintain traffic the existing structure shall be removed. Steel beams shall be carefully dismantled and piled along the right-of-way for disposal by the State's forces. The rear abutment shall remain in place except that the backwall shall be removed to the bridge seat elevation. The pier shall be removed to ground line. The forward abutment shall be removed to ground line at the face of the abutment. Both abutment slopes shall be dressed at 2:1. Suitable waste masonry shall be used as bank protection where directed by the Engineer. The remainder of the removed materials shall become the property of the Contractor. Slope dressing as required above shall be included with Item S-24, "Removal of Existing Structure" for payment.

PILES for the rear abutment shall be driven to a minimum bearing capacity of 41 tons. The length of penetration of every pile shall be at least 80% of the estimated average pay length of the piles in the pertinent pier or abutment as indicated on the plans unless a lesser penetration is approved by the Director.

PILES for the rear pier and forward abutment shall be driven with a hammer of not less than 15,000 '# energy per blow, to firm contact with shale which shall be considered as attained when the capacity according to the formula in Sec. S-18.05 is at least 75 tons per pile for the pier piles and 60 tons for the abutment piles and if the length of penetration is approximately equal to the depth to shale according to the bridge foundation investigation report. (The design load is 45 tons per pile for the pier piles and 41 tons for the abutment piles.) The length of penetration of every pile shall be at least 80 % of the estimated average pay length of the piles in the pertinent pier or abutment as indicated on the plans unless a lesser penetration is approved by the Director.

FOOTING for the forward pier shall extend a minimum of 3" into solid shale, or to the elevation shown, whichever is lower.

GRAVEL, if used as the coarse aggregate, shall be according to Sec. M-3.93 instead of M-3.91 for Class "C" concrete in the superstructure. Gravel meeting the requirements of Sec. M-3.93 also may be used for other concrete in this structure.

POROUS DRAINS, extending from face of abutment to Elev. 942, shall be provided as shown on the General Plan. The drains shall be 7 feet wide at the low end, tapering to 4 Ft. wide at the face of the abutment, and one foot thick.

REINFORCING STEEL shall clear all surfaces of concrete by 2 inches, unless otherwise noted on the plans.

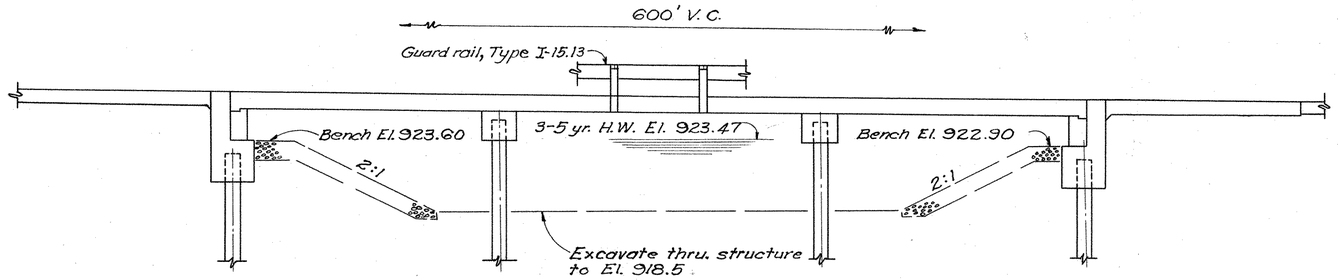
GENERAL PLAN



GENERAL NOTES

REFERENCE shall be made to Standard Drawings CS-1-54 revised 7-16-56, A-1-54 and P-1-54 both revised 12-1-54.

REMOVAL OF EXISTING STRUCTURE: When no longer needed to maintain traffic, the existing structure shall be removed. Steel beams and steel beam guard rail shall be carefully dismantled and piled along the right-of-way for disposal by State's forces. The substructure shall be removed to proposed ground line and to whatever extent is necessary to avoid interference with the new construction, including pile driving. Suitable waste masonry shall be disposed of as bank protection as directed by the Engineer. Other waste masonry may be placed in the embankment under and adjacent to the proposed structure at the direction of the Engineer. The remainder of the removed materials shall become the property of the Contractor.

PILES shall be driven to a minimum bearing capacity of 22 tons for the abutments and 26 tons for the piers. The length of penetration of every pile shall be at least 80% of the estimated average length of penetration of the piles in the pertinent pier or abutment as indicated on the plans, unless a lesser penetration is approved by the Director.

PIER PILE ENCASEMENT as shown on Std. Dwg. No. P-1-54 may be omitted provided that the tapered portion, if any, of all pier piles does not extend above the stream bed or the proposed surface of the ground. If the tapered portion of any pile extends above these limitations, the encasement will be required for all pier piles. If the encasement is omitted, the painting of the piles shall extend to low water elevation or, if the proposed surface of the ground is above low water, it shall extend to at least one foot below the proposed surface of the ground.

GRAVEL, if used as the coarse aggregate, shall be according to Sec. M-3.93 instead of M-3.91 for Class "C" concrete in the superstructure. Gravel meeting the requirements of Sec. M-3.93 also may be used for other concrete in this structure.

GALVANIZING of all members which are specified to be galvanized shall be as called for in Sec. M-7.4 (d).

PAINT, both shop and field, shall be applied by brushing. Spray application will not be permitted.

POROUS DRAINS, extending from face of abutment to Elev. 918.5, shall be provided at all four corners of the bridge. The drains shall be 4 ft. wide and one foot thick.

ASPHALTIC CONCRETE SURFACE COURSE, Item T-35, laid in two courses, shall be provided.
