**FENCE CONSTRUCTION**

Maximum spacing between intermediate anchor post assemblies or between end post assemblies and intermediate post assemblies shall be 660 Lin. Ft.

At points where individual spans of fence change alignment in excess of 4 degrees and less than 30 degrees, an intermediate anchor post assembly shall be built. If the change in alignment is 30 degrees or more a corner post assembly shall be built at the point of change.

In lieu of the requirements of Supplemental Specification No. 18 the End Posts, Corner Posts and Intermediate Anchor Posts or Pull Posts shall be placed so that the side of the posts toward the highway is two feet from the Right of Way line unless otherwise shown on the plan.

**METHOD OF MEASUREMENT**

All quantities of fence shown in these plans are measured horizontally and no allowance will be made for increase in lengths due to following the slope of the existing ground.

It shall be the responsibility of the Contractor to estimate and furnish at no additional cost to the State, any and all extra fence necessitated by this provision.

All final fence measurements will be horizontal measurements and the footage measured in this manner will be paid for at the Contract Unit Price bidder lineal foot for Item 55-18 Right of Way Fence Type A.

**ADJACENT OR INTERSECTING FENCES**

At all adjacent or intersecting fences a Corner Post Assembly has been provided in these plans. It shall be the responsibility of the Contractor to make a complete connection between these adjacent or intersecting fences and the Right of Way Fence.

Payment for all labor, tools material and incidentals necessary to complete these connections shall be included in the price bid for Item 55-18 Right of Way Fence
