Curtis,
I did not send a work order for the left bridge, it was not as bad as the right.

TY,
Do we need a MOTEC exception for I-77 at bridge listed above.

Albert,
Is the left bridge starting to do the same time. Did you send a work order to Tom and Tod?

Thanks
Curtis

Curtis,
Another backwall/expansion joint failure. Top of backwall spalling and cheese plates getting exposed. The beams are contacting the backwall and causing it to shear. See attached photos.
