Albert,
Would you take a look at this?

Curtis,
The GUE 70 bridge over SR 285 that was repaired this spring by contract was hit again at some point in the last couple of weeks. The attached pictures show the damage. It appears to be mainly cosmetic but I wanted to make you aware.

Thanks,
Mark Atkinson, P.E.

It appears to be a building of some sort that hit it. That is a piece of insulation on the beam and there is particle board on the ground around it
