PART 2
For Part 1 See
CLA-40-24.31

The Standard Specifications of the State of Ohio, Department of Highways, including changes and Supplemental Specifications listed in the proposal shall govern this improvement.

I hereby approve these plans and declare that the making of this improvement will not require the closing to traffic of the highway and that provisions for the maintenance and safety of traffic will be as set forth on the plans and estimates.

The right of way for this improvement will be provided by the State of Ohio.

MAD.-40-(0.00-6.84)

FINISHING CONCRETE PAVEMENT÷ Hand finishing will be permitted as per Sec. T-71.211 of the General Specifications at intersections and at Sta. 361+49.35 to Sta. 363+99.70.

* L-9 SEEDING & PROTECTING ROADWAY AREAS÷ Quantities for seeding Item L-9 are calculated for the soil areas between lines ten feet (10) outside the work limits as shown on the cross sections or to the R/W line if such line is less than ten (10) feet from the work limits.

L-9 COMMERCIAL FERTILIZER÷ Commercial fertilizer with an analysis of 10-6-4 shall be applied to all areas having seeding or sodding and shall be disced, harrowed or raked into the soil to a depth of (2") two inches. To be applied at the rate of 20 lbs. per 1000 sq. ft.

EXISTING PAVEMENT REMOVAL÷ After the existing pavement has been removed from Sta. 104+30 to 109+40, and from Sta. 151+15 to 153+85 the old roadway shall be plowed, harrowed and dragged to a smooth grade, the old ditches filled and the entire area left in a neat condition. Cost of this work shall be included in the price bid for pavement removal, Item E-8. Areas shall then be seeded and mulched, Item L-9.

FIELD OFFICE÷ The contractor shall provide a field office having a minimum of 150 sq. ft. of floor space and shall conform with the requirements of Sec. S.0.01b.

CONNECTING DRAINS÷ Existing farm drains and house connections that are cut or intercepted by the new drainage system shall be connected to the new drainage system. Connections to be made where and directed by the Engineer.

40 Farm drains @ 20' = 800 Lin. Ft.
20 House drains @ 10' = 200 " ".
Total 6" Pipe 1000 " ".

F-24(3) = 380 Lin. Ft., F-190(5) 7221 = 580 Lin. Ft., F-190(5) 6201 = 40 Lin. Ft.

RESETTING OF MONUMENTS÷ The existing monuments shall be carefully removed by the contractor and reset at the location designated by the engineer. Special care shall be taken to place the monument in its exact location. For the location of existing monuments see Plan Sheets.

REMOVAL OF EXISTING R/W MONUMENTS÷ All existing right-of-way monuments which will be disturbed in the construction shall be carefully removed and placed along the right-of-way available for removal by State forces. The cost of removal of the right-of-way monuments to be included in the unit price bid for E-1 excavation. Estimated monuments to be removed = 68.

PIPE REMOVAL÷ The removal and disposal of any existing pipe lying within the limits of the proposed excavation, of either Item E-1, or E-2, is classified and paid for as excavation and shall be removed and disposed of by the contractor.

CONCRETE (AND/OR) MASONRY REMOVAL÷ The removal and disposal of the whole or any portion of existing steps, side walks, walls, headwalls, curb and foundations, lying within the limits of the proposed excavation, of either Items E-1 or E-2 and not listed for removal is classified and paid for as excavation and shall be removed and disposed of by the contractor.

FLARED GUARD RAIL÷ Guard rail shall be flared to meet bridge railing in such a manner that the change in alignment at the guard rail will not exceed 1 to 10.

EMBANKMENT÷ In lieu of the requirements for full width construction under E 1.04, the embankment, where traffic is maintained, may be placed in port width construction at Stations 7+50 to 16+00, 47+50 to 51+50, 99+97 to 105+00, 154+00 to 161+01.26, 350+65.03 to 363+99.7.

UTILITY ADJUSTMENT÷ Any and all work required for Public or Private Utilities will be done by and at the expense of their respective owners unless otherwise noted in these plans.

TRAFFIC AND SCHEDULE OF OPERATIONS÷ Two-way traffic shall be maintained at all times. The item of "Maintaining Traffic" shall include furnishing lights, signs, barricades and watchmen necessary to secure the flow of two-way traffic twenty-four (24) hours daily.

The Contractor shall, before work is started on this contract submit to the Director for approval, a schedule of operations.

The items T-10 and M-10 are calculated to provide a temporary cross-over at Station 6+38, a temporary connecting road from Station 104+00 to 106+00 and from Station 154+00 to 156+00 and from Station 355+00 to 363+99.7.⊕ The temporary road shall be surfaced 20' wide and have berms not less than 3' wide. One way traffic shall be maintained at all times at the intersections with Route 56 and Route 38. The items T-10 and M-10 include one-way traffic lanes at the intersections with Route 56 and Route 38. The cost of constructing, maintaining and removing the temporary road and cross-overs is included in the unit price bid for Items T-10 and M-10.

Estimated Quantities

	T-10	M-10
F-24-(3) Code 7221 =	296.0 Cu.Yds.	5.9 Tons
F-190(5) Code 7221 =	1042.0 " "	20.9 "
F-190(5) Code 6201 =	185.0 " "	3.7 "
	1523.0 Cu.Yds.	30.5 Tons

The above traffic scheme is based on a schedule that the new eastbound bridge at Sta. 49+14, the pavement from Sta. 5+50 to 66+00, and the crossover at Sta. 65+52 will be built and opened to traffic before the existing bridge at Sta. 49+14 is closed to traffic.

⊕ The items T-10 & M-10 also include a temporary run-around at Sta. 293+00 to Sta. 298+00 during construction of the outlet pipe (see Sheet 132) and the pavement replacement.

* L-9 SEEDING & PROTECTING – TYPE "A" (Continued) ÷

All areas outside these limits where the vegetative growth has been injuriously disturbed or destroyed by the contractor shall be restored and seeded in accordance with the provisions of Item L-9 by the contractor at his own expense.

Seed mixtures to be used shall be as follows÷

(a.) In the median strip Sta. 0-22.66 to Sta 161+00, 15% Perennial Ryegrass (Lolium perenne); 15% Alsike Clover (Trifolium hybridum); 10% Hairy Vetch (Vicia villosa); 60% Kentucky Bluegrass (Poa pratensis) shall be sown at the rate of 4 lbs. per 1000 sq. ft.

(b.) In the median strip Sta. 161+00 to Sta. 359+00, the above mixture (a.) shall be sown at the rate of 3 lbs. per 1000 sq. ft.

(c.) Over all other areas the above mixture (a.) shall be sown at the rate of 4 lbs. per 1000 sq. ft., but (in group "C" only) 60% Meadow Fescue (Festuca pratensis), Alta Fescue (Festuca elatior var. Alta) and/or Chewings Fescue (Festuca rubra var. fallax) may be substituted for Kentucky Bluegrass.

DECLARATION OF LIMITATION OF ACCESS÷

This improvement between Sta. 0-22.66 and Sta. 363+99.70 has been declared a limited access highway or freeway by action of the Director of Highways in accordance with the provisions of Section 1178-21, General Code of Ohio. Recorded in Volume 35, Page 410 of the Director's Journal.

DESIGN SPEED ÷ is (70) seventy miles per hour.

GENERAL NOTES

REFERENCE shall be made to Standard Drawings CS-1-47, revised 1-20-48; A-1-49, dated 7-27-49; and to P-1-49, dated 7-27-49.

REMOVAL OF EXISTING BRIDGE: Existing structure to be removed and disposed of at the site as directed by the Engineer.

TWO-WAY TRAFFIC to be maintained at all times.

PILING shall be driven to a minimum bearing capacity of 35 tons.

SURFACE FINISH OF CONCRETE: Fascia of deck slab shall receive a rubbed surface finish. All other exposed surfaces shall be governed by the provisions of Item S-1.

CONCRETE GUTTERS shall be 6 ft. wide and 6 in. thick, and shall be depressed 6 in. at the center. They shall extend from face of abutment down to Elev. 1080.3 and shall be centered under edges of deck. Reinforcing bars 2"ϕ @ 1'-6" centers, both directions, included in price per lin. ft.

BITUMINOUS SURFACE COURSE: 2½" Asphaltic concrete surface course, Item T-35, laid in two 1¼" courses.

EXCAVATION quantity includes the removal of fill material between top of earth bench and bottom of abutment crossbeam.

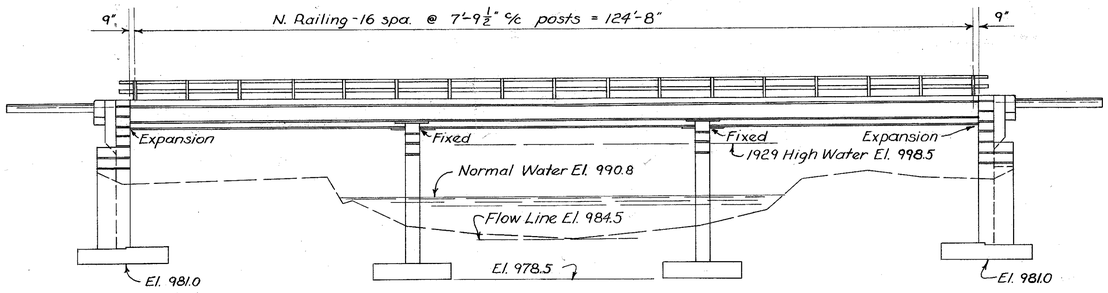
GENERAL PLAN



NORTH ELEVATION

GENERAL NOTES

REFERENCE shall be made to Standard Drawing CSB-1-47, revised 8-25-49, and to Supplemental Specification S-303, dated 12-20-46.

REMOVAL OF PORTIONS OF EXISTING STRUCTURE: Existing superstructure – Concrete and reinforcing steel shall be removed from north and south railing to top of curb. Tops of curb surfaces shall be finished to produce a smooth even surface.
Existing substructure- Remove northwest and northeast wingwall to the limits as shown on sheets Nos. 175 and 176.

WELDING shall be class "A" except as shown.

SURFACE FINISH OF CONCRETE: Fascias of deck and curb faces shall receive a rubbed surface finish. All other exposed surfaces shall be governed by the provisions of Item S-1.

BITUMINOUS SURFACE COURSE: 2½" Asphaltic concrete surface course, Item T-35, laid in two 1¼" courses.
