1. Overhead Flasher
2. 45 mph Speed Zone
3. Advance Intersection Warning Signs
4. Jct 134 signs
5. No Passing Zone

Check Signal Warrant

Check ISD against L&D requirements

If signal warrant cannot be met and ISD meets the minimum L&D requirements then respond: ISD minimum requirements are met / the appropriate safety measures (listed above) are already implemented and seem to be effective, Only 3 accidents for 3 year period 94, 95, & 96.

If ISD is deficient then respond appropriate safety measures have been implemented and seem to be effective. Only chance of major improvement is to get safety funds. Funding will be based on priority, ~~there~~ funding isn't likely to be soon.
