

## Certification of Right of Way Control Letter 1

January 26, 2024

Mr. Eric Ross  
Acting Division Administrator  
Federal Highway Administration  
200 North High Street  
Columbus, OH 43215

Re: C/R/S: COL Fairfield Sch Rd & Lisbon St  
PID: 114039  
Federal Project Number: E210166

Dear Mr. Ross:

I certify that:

### 1. STATUS OF THE REQUIRED RIGHT OF WAY:

The acquisition of right of way was not required. All work proposed is within the existing right of way.

### 2. COMPLIANCE WITH RELOCATION ASSISTANCE PROGRAM REQUIREMENTS

For this project, there were no displacements of individuals, personal property, residences, businesses, farms or not for profit organizations.

### 3. STATUS OF REQUIRED UTILITY RELOCATIONS

There are utilities within the construction limits of the project. The status of these arrangements for the completion of the work prior to or in coordination with the physical construction is shown on the Utility Note below.

#### UTILITY NOTE

CITY OF COLUMBIANA - Sanitary Sewer, Storm Sewer, Water, and Electric

The city has existing buried sanitary sewer facilities within the project limits, which will remain in place and in service during construction. The contractor is to protect the existing buried sanitary sewer facilities during construction.

- The existing sanitary sewer manholes within pertinent pavement areas will be adjusted to grade by the contractor as part of the proposed project.
- Vertical sanitary sewer force main relocation may be necessary to accommodate the proposed drainage improvements at Sta. 54+05 along Lisbon Street which will be performed by the contractor as part of the proposed project, as further defined in the construction plans.
- No other sanitary sewer relocation work is anticipated.

The city has existing buried storm sewer facilities within the project limits, which will remain in place and in service during construction. The contractor is to protect the existing buried storm sewer facilities during construction.

- Specific existing storm sewer manholes, existing catch basins, and existing curb inlets within pertinent pavement areas will be adjusted to grade and/or reconstructed to grade by the contractor as part of the proposed project, as further defined in the construction plans.
- Specific existing catch basins and existing storm piping will be removed and replaced by the contractor as part of the proposed project, as further defined in the construction plans.
- New storm sewer facilities (i.e. manholes, catch basins, and storm piping) in specific locations of the project will be installed by the contractor as part of the proposed project, as further defined in the construction plans.

The city has existing buried water distribution and raw water facilities within the project limits, which will remain in place and in service during construction. The contractor is to protect the existing water distribution and raw water facilities during construction.

- Vertical waterline distribution relocation may be necessary to accommodate the proposed drainage improvements at Sta. 54+05 along Lisbon Street which will be performed by the contractor as part of the proposed project, as further defined in the construction plans.
- No other water distribution or raw water facility relocation work is anticipated.

The city has existing aerial electric facilities and existing lighting facilities within the project limits, which will remain in place and in service during construction (no relocation work is anticipated). The contractor is to protect the existing aerial electric facilities and existing lighting facilities during construction. **EXTREME CAUTION MUST BE USED** when working around energized conductors and **ALL OSHA CLEARANCES MUST BE MAINTAINED**.

#### **OHIO EDISON** - Electric

The company has existing aerial electric facilities and existing lighting facilities within the project limits, which will remain in place and in service during construction (no relocation work is anticipated). The contractor is to protect the existing aerial electric facilities and existing lighting facilities during construction. **EXTREME CAUTION MUST BE USED** when working around energized conductors and **ALL OSHA CLEARANCES MUST BE MAINTAINED**.

#### **COLUMBIA GAS OF OHIO** - Gas Distribution

The company has existing buried gas distribution facilities within the project limits, which will remain in place and in service during construction. The contractor is to protect the existing buried gas distribution facilities during construction. Due conflicts with the installation of pertinent storm sewer facilities, the following gas distribution facilities will be relocated on or before March 31, 2024:

- Along Fairfield School Road, at the intersection of Metz Road, and along the east side of the roadway, the existing gas distribution facilities will be relocated both horizontally and vertically between approximate Sta. 27+00 and approximate Sta. 27+50 in order to accommodate the removal of the existing storm sewer facilities and installation of the new storm sewer facilities.
- Along Fairfield School Road, between approximate Sta. 35+25 and approximate Sta. 43+57, and along the west side of the roadway, the existing gas distribution facilities will be relocated both horizontally (to approximately 19.5 feet left) and vertically (to an approximate depth of cover of 48") in order to accommodate the installation of the new storm sewer facilities.
- No other gas distribution facility relocation work is anticipated.

**AT&T** - Telephone / Communications

The company has existing aerial and underground telephone/communications facilities within the project limits, which will remain in place and in service during construction (no relocation work is anticipated). The contractor is to protect the existing aerial and underground telephone/communications facilities during construction.

**COMCAST** - Television / Communications

The company has existing aerial television/communications facilities within the project limits, which will remain in place and in service during construction (no relocation work is anticipated). The contractor is to protect the existing aerial television/communications facilities during construction.

**4. STATUS OF RAILROAD OPERATING FACILITIES**

None affected.

**5. ENCROACHMENTS**

All right of way clearance work has been completed and there are no improvements or obstructions remaining within the right of way area required for construction.

**6. COMPLIANCE STATEMENT**

All right of way acquisitions, if any, and all relocation activities, if any, have been done in compliance with 23 CFR 635.309(c)(1) and are also compliant to:

- 42 United States Code, Chapter 61 - The Uniform Act.
- All pertinent federal directives and regulations - to include 49 CFR Part 24.
- The current Real Estate Manual of the Ohio Department of Transportation which has been approved by FHWA.

Respectfully,

Stephen M. Lucas, P.S.  
Real Estate Administrator, District 11

## LPA Certification of Right of Way Control Letter 1

January 8, 2024

Mr. Stephen M. Lucas, P.S.  
District Real Estate Administrator  
Ohio Department of Transportation  
2201 Reiser Avenue, SE  
New Philadelphia, Ohio 44663

Re: C/R/S: COL Fairfield Sch Rd & Lisbon St  
PID: 114039  
Federal Project Number: E210166

Dear Mr. Lucas:

I certify that:

- 1. STATUS OF THE REQUIRED RIGHT OF WAY:** The acquisition of right of way was not required. All work proposed is within the existing right of way, except in the following location:
  - Pavement planing with asphalt overlay is proposed to the roadway pavement located at the northeast corner of the intersection of Lisbon Street and West Friend Street. A very small portion of the City of Columbiana property extends into the roadway pavement at the aforementioned location as shown on Sheet 45 of the construction plans, and as further identified on Sheet 45 of the construction plans as Lands Owned By Village of Columbiana; Lot #51 of Sturgeon's 2nd Addition; P.P.N. 18-50039.000; D.V. 160 / PG. 342.
  - ODOT District 11 has previously confirmed that the acquiring of additional right-of-way will not be necessary to accommodate the proposed pavement planing with asphalt overlay at the aforementioned location.
- 2. COMPLIANCE WITH RELOCATION ASSISTANCE PROGRAM REQUIREMENTS**  
For this project, there were no displacements of individuals, personal property, residences, businesses, farms or not for profit organizations.
- 3. STATUS OF REQUIRED UTILITY RELOCATIONS**  
There are utilities within the construction limits of the project. The status of these arrangements for the completion of the work prior to or in coordination with the physical construction is shown on the Utility Note below.

## UTILITY NOTE

### CITY OF COLUMBIANA – Sanitary Sewer, Storm Sewer, Water, and Electric

The City has existing buried sanitary sewer facilities within the project limits, which will remain in place and in service during construction. The Contractor is to protect the existing buried sanitary sewer facilities during construction.

- The existing sanitary sewer manholes within pertinent pavement areas will be adjusted to grade by the Contractor as part of the proposed project.
- Vertical sanitary sewer force main relocation may be necessary to accommodate the proposed drainage improvements at Sta. 54+05 along Lisbon Street which will be performed by the Contractor as part of the proposed project, as further defined in the construction plans.
- No other sanitary sewer relocation work is anticipated.

The City has existing buried storm sewer facilities within the project limits, which will remain in place and in service during construction. The Contractor is to protect the existing buried storm sewer facilities during construction.

- Specific existing storm sewer manholes, existing catch basins, and existing curb inlets within pertinent pavement areas will be adjusted to grade and/or reconstructed to grade by the Contractor as part of the proposed project, as further defined in the construction plans.
- Specific existing catch basins and existing storm piping will be removed and replaced by the Contractor as part of the proposed project, as further defined in the construction plans.
- New storm sewer facilities (i.e. manholes, catch basins, and storm piping) in specific locations of the project will be installed by the Contractor as part of the proposed project, as further defined in the construction plans.

The City has existing buried water distribution and raw water facilities within the project limits, which will remain in place and in service during construction. The Contractor is to protect the existing water distribution and raw water facilities during construction.

- Vertical waterline distribution relocation may be necessary to accommodate the proposed drainage improvements at Sta. 54+05 along Lisbon Street which will be performed by the Contractor as part of the proposed project, as further defined in the construction plans.
- No other water distribution or raw water facility relocation work is anticipated.

The City has existing aerial electric facilities and existing lighting facilities within the project limits, which will remain in place and in service during construction (no relocation work is anticipated). The Contractor is to protect the existing aerial electric facilities and existing lighting facilities during construction. **EXTREME CAUTION MUST BE USED** when working around energized conductors and **ALL OSHA CLEARANCES MUST BE MAINTAINED**.

### OHIO EDISON – Electric

The company has existing aerial electric facilities and existing lighting facilities within the project limits, which will remain in place and in service during construction (no relocation work is anticipated). The Contractor is to protect the existing aerial electric facilities and existing lighting facilities during construction. **EXTREME CAUTION MUST BE USED** when working around energized conductors and **ALL OSHA CLEARANCES MUST BE MAINTAINED**.

### COLUMBIA GAS OF OHIO – Gas Distribution

The company has existing buried gas distribution facilities within the project limits, which will remain in place and in service during construction. The Contractor is to protect the existing buried gas distribution facilities during construction. Due conflicts with the installation of pertinent storm sewer facilities, the following gas distribution facilities will be relocated on or before March 31, 2024:

- Along Fairfield School Road, at the intersection of Metz Road, and along the east side of the roadway, the existing gas distribution facilities will be relocated both horizontally and vertically between approximate

Sta. 27+00 and approximate Sta. 27+50 in order to accommodate the removal of the existing storm sewer facilities and installation of the new storm sewer facilities.

- Along Fairfield School Road, between approximate Sta. 35+25 and approximate Sta. 43+57, and along the west side of the roadway, the existing gas distribution facilities will be relocated both horizontally (to approximately 19.5 feet left) and vertically (to an approximate depth of cover of 48") in order to accommodate the installation of the new storm sewer facilities.
- No other gas distribution facility relocation work is anticipated.

**AT&T** – Telephone / Communications

The company has existing aerial and underground telephone/communications facilities within the project limits, which will remain in place and in service during construction (no relocation work is anticipated). The Contractor is to protect the existing aerial and underground telephone/communications facilities during construction.

**COMCAST** – Television / Communications

The company has existing aerial television/communications facilities within the project limits, which will remain in place and in service during construction (no relocation work is anticipated). The Contractor is to protect the existing aerial television/communications facilities during construction.

**4. STATUS OF RAILROAD OPERATING FACILITIES**

None affected.

**5. ENCROACHMENTS**

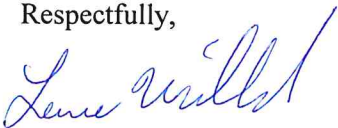

All right of way clearance work has been completed and there are no improvements or obstructions remaining within the right-of-way area required for construction. (See attached correspondence letter from the City of Columbiana for additional information).

**6. COMPLIANCE STATEMENT**

All right of way acquisitions, if any, and all relocation activities, if any, have been done in compliance with 23 CFR 635.309(c)(1) and are also compliant to:

- 42 United States Code, Chapter 61 – The Uniform Act.
- All pertinent federal directives and regulations – to include 49 CFR Part 24.
- The current Real Estate Manual of the Ohio Department of Transportation which has been approved by FHWA.

Respectfully,

Lance Willard  
City Manager, City of Columbiana

City Acknowledgement of Right of Way Encroachments

Dear Mr. Lucas:

Please accept this letter acknowledging the following relative to right-of-way encroachments along the length of the project:

- The City acknowledges the presence of right-of-way encroachments at various locations along the project length;
- The City grants permission for the right-of-way encroachments to remain; and
- The City acknowledges that the right-of-way encroachments that are to remain will not conflict with the construction activities.
- Note: This letter will be included as an attachment with the LPA Certification of Right of Way Control Letter.

Respectfully,

A handwritten signature in blue ink, appearing to read "Lance Willard", is written over a faint, larger version of the same signature.

Lance Willard  
City Manager, City of Columbiana
