Rev. 6-13-80

LIMITED ACCESS

This improvement is especially designed for through traffic and has been declared a limited access highway or freeway by action of the Director in accordance with the provisions of Section 5511.02 of the Revised Code of Ohio.

1979 SPECIFICATIONS

The standard specifications of the State of Ohio, Department of Transportation, including changes and supplemental specifications listed in the proposal shall govern this improvement.

I hereby approve these plans and declare that the making of this improvement will *not require* the closing to traffic of the highway and that provisions for the maintenance and safety of traffic will be as set forth on the plans and estimates.

Approved Robert M. Short
Date 2-13-80 District Deputy Director of Transportation
Acting

Approved Robert B Pfeifer
Date 3-14-80 Engineer, Bureau of Bridges and Structural Design

Approved Howard E. Nolan
Date 5-13-80 Chief Engineer, Planning and Design

Approved David L. Weis

⊙ ~ From Sta. 1262+03.90 to Sta. 1280+75 W.Bound Outside Shoulder Treatment shall be as shown in Westbound Outside Shoulder Details on Sheet No. 4.

T.S.✱ ~ From Sta. 1280+75 Sta. 1334+03.75, W.Bound Outside Shoulder Treatment shall be as shown on the Typical Sections on Sheet No. 5.

LEGEND: ▨ ~ Item 203 ~ Linear Grading (See General Note)
For Pavement Items Legend See Sheet Nos. 3, 4, 5 & 6

Linear grading as shown indicates generally anticipated conditions. However, in some areas the portion beyond the paved shoulder may require excavation instead of the fill shown on these details. In such areas, the cross-slope shall be similar to that of the adjacent paved shoulder unless otherwise directed by the Engineer.

659 ~ SEEDING AND MULCHING

MAINLINE ~ OUTSIDE SHOULDERS

Total Length of Shoulders = 54,740.50 L.F.
Deduct for Length of Bridges = 1,388.21 L.F.
Deduct for Guard Rail = 18,569.05 L.F.
Deduct for Intersections = 506.00 L.F.

Total 4'± Seeding Width Area = 34,277.24 L.F. × 4.0' ÷ 9 = 15,234.3 Sq. Yds.
Add for Ditch Cleanout Areas = 21,700.00 L.F. × 8.0' ÷ 9 = 19,288.9 Sq. Yds.

MAINLINE ~ MEDIAN

Total Length of 2 Ft. Seeding Width = 12,639.49 L.F.
Deduct for Length of Bridges = 133.06 L.F.
Deduct for Intersections = 151.00 L.F.

12,355.43 L.F. × 2.0' ÷ 9 = 2745.7 Sq. Yds.

Total Length of 4 Ft. Seeding Width, 27,069.01 L.F.
Deduct for Length of Bridges = 962.99 L.F.
Deduct for Intersections = 150.00 L.F.

25,956.02 L.F. × 4.0' ÷ 9 = 11,536.0 Sq. Yds.

RAMP "J"	1132.05 L.F. × 3.0' ÷ 9 =	377.4 Sq. Yds.
RAMP "K"	757.75 L.F. × 3.0' ÷ 9 =	252.6 Sq. Yds.
	1474.58 L.F. × 4.0' ÷ 9 =	655.4 Sq. Yds.
RAMP "L"	738.91 L.F. × 3.0' ÷ 9 =	246.3 Sq. Yds.
RAMP "M"	1020.59 L.F. × 3.0' ÷ 9 =	340.2 Sq. Yds.
RAMP "N"	2398.76 L.F. × 3.0' ÷ 9 =	799.6 Sq. Yds.
RAMP "Q"	2709.02 L.F. × 3.0' ÷ 9 =	903.0 Sq. Yds.
RAMP "S"	1406.76 L.F. × 3.0' ÷ 9 =	468.9 Sq. Yds.
RAMP "T"	1681.66 L.F. × 3.0' ÷ 9 =	560.6 Sq. Yds.
Add For Removal of Exist. Med X-Overs (From Sht. N°. 51)		870.0 Sq. Yds.

MEDIAN CROSS-SECTIONS
(From Sht. N°. 40) Sta. 1155+00 to Sta. 1158+50 = 1080.0 Sq. Yds.

CROSS-SECTIONS FOR PROFILE CORRECTIONS
U.S. 22 (From Sht. N°. 43) Sta. 1099+75 to Sta. 1105+00 = 367.0 Sq. Yds.
S.R. 151 (From Sht. N°. 45) Sta. 256+51.09 To Sta. 258+50 = 428.0 Sq. Yds.

S.R. 151 92.83 Lin. Ft. × 14.0' ÷ 9 = 144.4 Sq. Yds.

TOTAL SEEDING 56,298.3 Sq. Yds.

CALCULATIONS

GENERAL NOTES

FHWA REGION	STATE	PROJECT	
5	OHIO		

14/80

HAS-22-20.07

FIELD OFFICE:
The Contractor shall provide a suitable field office having a minimum of 400 Sq.Ft. of floor space.

ROUNDING OF CORNERS SHOWN ON CROSS SECTIONS:
The rounded corners shown on the typical sections, apply to all cross sections even though otherwise shown on these plans.

ESTIMATED QUANTITIES:
Specific locations and usage of estimated quantities set up on this plan to be used "as directed by the Engineer" shall be made a matter of record by incorporation into the final change order governing completion of this project. Estimated quantities of materials shall not be ordered for delivery to the project unless authorized by the Engineer.

PREVIOUS CONSTRUCTION PLANS:
The following construction plans are available for reference by contacting the District 11 Office in New Philadelphia, Ohio.
HAS/JEF-2-2-18.97/0.00

ALIGNMENT AND PROFILE:
The work proposed by this project is for the resurfacing of the existing pavement. The alignment of the existing pavement will not be changed and the profile of the proposed surface will be similar to that of the existing pavement except that it will be raised an amount equal to the thickness of the resurfacing course or courses specified in these plans except for the areas shown on Sheet Nº 41 & 42 & 44 where extra material has been provided for profile correction.

TRENCH FOR PAVED SHOULDER:
Trench excavation for paved shoulder construction shall be performed only on one side of the pavement at a time. The open trench shall be adequately maintained and protected with drums or barricades at all times. Placement of proposed 301 Bituminous aggregate base shall follow as closely as possible behind the excavation operations. The length of trench which is open at any one time shall be held to a minimum and shall at all times be subject to approval of the Engineer.

SHOULDER TREATMENT & ITEM 408 BITUMINOUS PRIME COAT, AS PER PLAN:
A 4 Ft. width adjacent to the outside paved shoulder in guardrail areas shall be paved with a 2" compacted course of Item 848 Asphalt Concrete as shown on the Typical Sections and outside shoulder details.
Prior to placing this material a soil sterilizer using one of the following brands shall be applied at the rate recommended by the manufacturer: 1.) Paraquat C.L. by Ortho; 2.) Pramitol 25 E by Ciba-Geigy; 3.) Krovar by Diamond Shamrock or approved equal.
Item 408 Prime Coat using MC 30, MC-70, prime-20, RT-2 or RT-3 shall be applied at the rate of 0.5 gal/sq.yd. prior to placing the 848 Asphalt Concrete.
After the 848 has been placed and compacted, the surface shall be treated with Items 409 Bituminous Material and Cover Aggregate as per the mainline shoulder treatment.
Holes for guard rail posts shall then be bored to a depth of 6" and posts installed. The disturbed area around each post shall then be backfilled with 848 and surface treated with 409 as before.
Payment for all the above described RESURFACING SHALL BE INCLUDED IN THE UNIT PRICE BID PER CUBIC YARD FOR ITEM 848-ASPHALT CONCRETE SURFACE COURSE, TYPE 1 WITH THE FOLLOWING EXCEPTIONS:
SOIL STERILANT AND PRIME COAT SHALL BE PAID FOR AT THE UNIT PRICE BID FOR ITEM 408 - BITUMINOUS PRIME COAT, AS PER PLAN and Surface Treatment shall be paid for at the unit price bid for the respective 409 Seal Coat Bituminous Material and Cover Aggregate Items.

ITEM 203-LINEAR GRADING
This work shall include all excavation and embankment required to construct paved shoulders, median cross-overs, asphalt concrete shoulder treatment in specified areas, and grading beyond paved shoulders in accordance with the typical sections, plan details, calculations and as specified herein.
Any excess turf, material build-up or excavated material shall be removed and disposed of by the contractor or wasted over fill slopes at the direction of the Engineer. Linear Grading widths shown on the plan represent minimum requirements and the Engineer may increase these widths as determined by his analysis of project conditions at no additional cost.
Payment for this work will be made as follows:
1.) Item 203-Linear Grading, method 1-this item shall apply to mainline and speed change lane outside shoulder areas as follows:
a) areas w/o guard rail and asphalt concrete shoulder treatment.
b) where no work is to be done on existing guardrail but new paved shoulders are being constructed.
2.) Item 203-Linear Grading, method 2-this item shall apply to mainline and speed change lane outside shoulder areas with guardrail and asphalt concrete shoulder treatment.
3.) Item 203-Linear Grading, method 3-this item shall apply to all mainline median shoulder areas and shall include all excavation and embankment required to construct median cross-overs and to remove and/or obliterate existing median cross-overs where specified on the plan sheets. (See Note on sheet Nº 51)
4.) Item 203-Linear Grading, method 4-this item shall apply to all ramps.
5.) Item 203-Linear Grading, method 5-this item shall apply to all cross-roads & intersecting roads where guardrail is being constructed. This item shall consist of grading the existing shoulder between the pavement edge and the shoulder breakpoint and removing excess turf and material in the vicinity of the guardrail to provide a positive slope away from the pavement. A slope of approximately 1" per Ft. shall be provided in these areas. The Engineer shall determine the need for this item during construction and shall non-perform this item in any areas where it is not necessary.
The method of measurement shall be considered as one station per 100 linear Ft. measured separately for Eastbound and Westbound lanes and for each ramp, cross-road, or intersecting road paved shoulder area and for each cross-road or intersecting road guardrail construction area.
Payment for all of the above described work shall be included in the unit price bid per station for the appropriate method of Item 203-Linear Grading.

ITEM 605 AGGREGATE DRAINS:
Aggregate drains shall be placed at Existing transverse Joints each side of normal crowned sections and at thirty (30) foot intervals on the low side only of superelevated sections, except where Item 605 Pipe Underdrains have been provided.

LOCATION OF GUARDRAIL:
The location of guardrail runs as shown in these plans are subject to adjustment to assure that the planned installations will afford maximum protection for traffic.

PUBLIC SAFETY:
No hazard shall be left unprotected except for the actual time necessary to remove, grade, install asphalt concrete shoulder protection (where specified) and reinstall guard rail in a continuous operation. The removal of all guard rail shall at all times be as directed by the Engineer. No guard rail shall be removed until the replacement material is on the site, ready for installation. Failure to comply with this requirement shall be deemed sufficient cause to order work suspended on this project until such time the Engineer is assured of said compliance.

GUARD RAIL REMOVED:
Guard rail designated for removal on this project shall be carefully dismantled and the salvageable rail elements stored on the project for removal by State forces.
All posts, blocks, bolts, damaged rail and other material not considered salvageable shall be disposed of as directed. All post holes shall be carefully filled and tamped and the site cleaned and restored.
Site restoration will include grading of the shoulder in the area of the guard rail removal to provide proper shoulder drainage and smooth shoulder slopes where traffic or weather may have built a ridge of earth and debris under the guard rail. The graded or disturbed area shall be reseeded except, where new guard rail is to be constructed, an area under the new guard rail 3' wide, measured from one foot in front of the rail (or centered under guard rail, barrier design) shall not be seeded.
Payment for all of the above shall be at the unit price bid for 202 Guard Rail removed for Storage or 202 Guard Rail, barrier design, removed for Storage, measured by the linear foot center to center of terminal posts of center of bridge connection splices.

GUARD RAIL OVER CULVERTS:
When sufficient post depth is not available due to a culvert, the guard rail posts directly over the culvert shall not be driven but set in holes. If the distance between the ground line and the top of the culvert is less than 3 Ft., the post shall be encased in a minimum of 4" thickness of Class C concrete for the full depth of the post. Payment for the above shall be included in the unit price bid for Item 606, Guard Rail, Type 5 or Item 606 Guard Rail, Type 5, Barrier Design.

FASTENING OF BRIDGE TERMINAL ASSEMBLIES:
Bridge terminal assemblies which are to be fastened to existing concrete parapets by steel box blockouts shall be attached by means of through bolts. Expansion anchor bolts will not be permitted.
Where self-drilled anchors are permitted and are used, the holes shall be drilled with the tubular expansion shell, rather than with a bit to insure a proper fit.
The anchors shall be installed flush with the surface of concrete.
Where anchorage by expansion bolts to a deteriorated concrete surface would result in a questionable attachment, through bolts shall be used instead, at the direction of the Engineer.

TACK COAT:
The tack coat operation shall be as determined at a pre-construction conference as per 407.05 and application rates shall not exceed 0.10 gal per sq. yd..

FEATHERING:
The new surface shall be feathered to meet the existing pavement at the beginning and end of the project in accordance with standard drawing B.P-5 and details on Sheet Nº 50.

NON-PERFORMANCE OF PRESSURE RELIEF JOINTS:
If a full width (± 24 Ft.), full depth rigid pavement removal and flexible replacement occurs within 500 feet of a proposed pressure relief joint, that pressure relief joint shall be non-performed.

ITEM SPECIAL-PRESSURE RELIEF JOINTS, TYPE C, WITH RESURFACING:
Items 405 or 921 as shown on standard drawing B.P-11 shall be placed immediately upon removal of the existing pavement.

GENERAL NOTES

QUANTITIES	
Calculated By R.E.M. 8-2-79	Checked By J.C.N. 8-14-79

FHWA REGION	STATE	PROJECT	
5	OHIO		

HAS-22-20.07

15/80

MAINTAINING TRAFFIC:

U.S. 22~

Two way traffic shall be maintained at all times, except that one way traffic will be permitted in the two lane section for minimum periods of time consistent with the specifications for protection of completed asphalt concrete surface courses.

Traffic shall be maintained thru the profile correction area from Sta. 1099+75 to Sta. 1105+00 and on Bridge No. HAS 22-2126 by use of portions of existing, reconstructed, and/or resurfaced pavement, existing and overlayed portions of bridge deck, temporary roadways on existing shoulders surfaced with 404 Bituminous Concrete, For Maintaining Traffic, and completed shoulders (prior to application of 409 seal coat items).

At least one lane of traffic shall be maintained in each direction in the four lane section. Temporary cross-over roads shall be provided as shown on sheet Nos. 18 & 19 during reconstruction of the deck on Br. No. HAS 22-2460R. The length of restricted traffic zones in the remainder of the four lane section shall be kept to a minimum, consistent with the specification requirements for the protection of the work items which necessitate the restriction.

Particular care shall be exercised during construction of the concrete deck overlays on Bridge No's. HAS-22-2126, HAS 22-22-83 L&R and HAS 22-2362 L&R, so as to minimize impacts of traffic on the bridge decks by means of signs, flagmen, law enforcement officer with patrol car and other means as directed by the Engineer.

Ramps ~

Ramp traffic shall be maintained at all times by use of portions of existing and completed pavement and shoulders, and temporary pavement as shown on Sheet No. 17.

Bridge No. HAS-151-2310 Reconstruction ~ S.R. 151 (Jewett) Interchange

Reconstruction of Br. No. HAS 151-2310 (aka HAS-22-2188) shall be accomplished as follows:

1. Construct temporary pavement and erect traffic control devices as shown on sheet No. 17.
2. Close Bridge No. HAS 151-2310 to traffic and maintain traffic by means of the temporary pavement and traffic control devices placed in step 1.
3. Reconstruct Bridge No. HAS 151-2310 as shown on Sheet Nos. 68 thru 75. Construct new approach slabs and correct the approach pavement profile as shown on sheet Nos. 44 thru. 45.

General ~

The following estimated quantities have been included in the General Summary for the purpose of maintaining traffic as specified above:

Item 404 Bituminous Concrete For maintaining Traffic ..... 100 Cu. Yds.

FOR DUST CONTROL {
Item 616 Calcium Chloride ..... 3 Tons
Item 616 Water ..... 50 M.Gals.
}

Item 615 Temporary Pavement, Class B: (From sheet No. 19): 685 Sq. Yds.

Item 615 Temporary Roads ..... Lump Sum

The limits and duration of use of temporary roadways shall be held to an absolute minimum and in all cases shall be subject to the approval of the Engineer.

In addition to the requirements of Item 614 and sheet Nos. 16 thru. 22, a uniformed special duty Law Enforcement Officer (L.E.O.) and an offical Patrol Car with emergency flashers operating shall be provided in the following situations:

1) During the initial first day set-up period and last day tear down period of a lane closure and channelization of directional traffic into a reduced number of lanes. A flashing arrow panel in accordance with Standard Drawing TC-35.10 shall replace the L.E.O. with Patrol Car between the set-up and tear-down periods. A down-stream extension of such an arrangement shall not require the presence of a L.E.O. with Patrol Car.
2) When the beginning point of a lane closure is shifted substantially or a new lane closure is initiated in another part of the project.

The following Estimated Quantity has been included in the General Summary for the above purposes:

Item Special ~ Trooper with Patrol Car ..... 100 Hrs.

L.E.O. with Patrol Car may be used for other purposes in the project area. However, such usage is at the option of the Contractor and payment for L.E.O. services involved in such usage shall be included in the lump sum bid for Item 614 - Maintaining Traffic.

To direct traffic through this construction project, temporary pavement marking shall be used in accordance with the general note on sheet No. 16

ITEM 622~TEMPORARY CONCRETE BARRIER, AS PER PLAN:

This item shall consist of furnishing and erecting temporary concrete barrier in accordance with details shown on sheet Nos. 18 thru 20. Upon completion of the project the temporary concrete barrier shall become the property of the contractor and shall be removed from the right-of-way.

The following estimated quantity has been included in the General Summary for the work noted above:

Item 622-Temporary Concrete Barrier, as per plan 930 Lin.Ft.

ITEM 606~BRIDGE TERMINAL ASSEMBLY, TYPE A, MODIFIED AS PER PLAN:

This Item shall conform to the provisions of Standard Drawing GR-3 except for the following Modifications:

In lieu of the post shown at 12'-6" from the parapet end on GR-3, the existing concrete encased post located approximately 13'-1¼" from the parapet end shall remain in place and be incorporated into the new bridge terminal assembly. Two new post shall be constructed adjacent to the parapet end in accordance with the 4'-0" and 2'-3" spacing shown on the Standard Drawing. The space between the salvaged existing post and the adjacent new post shall be 6'-10¼" instead of 6'-3" as shown on GR-3 and a rail element shall be cut accommodate this space in accordance with 606.05.

ITEM 202~BRIDGE TERMINAL ASSEMBLY REMOVED:

Payment for this item shall include the additional cost in excess of normal guardrail removal cost for removing the following components of existing bridge terminal assemblies at specified locations: concrete encased post, connection brackets, brace rods and plates, and the exposed portion of existing anchor bolts which shall be cut off flush with the end of the bridge parapet.

Payment for all of the above work shall be included in the unit price bid for Item 202 Bridge Terminal Assembly Removed.

GUARDRAIL USING 9' POSTS:

Type 5 guardrail, using 9' posts shall be set 6'-5" min. in the ground. Except for the length of posts, all requirements of 606 shall apply.

Payment shall be per linear Ft. 606, guard rail type 5, using 9 Ft. posts, As per Plan.

SEEDING:

Quantities for seeding are calculated for the soil areas between the work limits, as shown on the typical sections and cross-sections.

ITEM 203~LINEAR GRADING (DITCH CLEANOUT):

This item shall consist of regrading mainline roadway ditches in cut sections to re-establish the original flow line and shall include all excavation necessary to re-construct the ditch in accordance with dimensions shown on the Typical Sections.

Estimated Quantities and approximate locations are shown on sheet No. 3. The Engineer shall determine the need for this item at each location during construction and shall non-perform this work in any areas where it is not necessary.

The method of measurement shall be considered as one station per 100 linear Ft. measured separately for eastbound and westbound lanes.

Payment for the above work shall be included in the unit price bid per station for Item 203~ Linear Grading (Ditch Cleanout).

614 TEMPORARY PAVEMENT MARKINGS

THE CONTRACTOR SHALL FURNISH, INSTALL, MAINTAIN, AND, WHEN NECESSARY, REMOVE TEMPORARY RETROREFLECTIVE PAVEMENT MARKINGS ON RECONSTRUCTED, RESURFACED OR TEMPORARY ROADS WITHIN THE WORK LIMITS, IN ACCORDANCE WITH THE FOLLOWING REQUIREMENTS.

THE TEMPORARY MARKINGS SHALL BE COMPLETE ON ALL PAVEMENT COURSES EXPOSED TO TRAFFIC AT THE END OF EACH DAY'S OPERATION. WHERE PERMANENT MARKINGS ARE CALLED FOR IN THESE PLANS, THE CONTRACTOR SHALL FURNISH AND PLACE THE PERMANENT MARKINGS WITHIN 30 CALENDAR DAYS, FOLLOWING COMPLETION OF ALL SURFACE COURSES IN A SINGLE ROADWAY OR PRIOR TO THE END OF THE CONSTRUCTION SEASON, WHICHEVER COMES FIRST.

TEMPORARY MARKINGS SHALL BE PLACED IN ACCORDANCE WITH *THE TABLE ON THIS SHEET* AND THE FOLLOWING REQUIREMENTS, UNLESS OTHERWISE SPECIFIED IN THE PLANS:

CENTER LINES AND LANE LINES SHALL CONSIST OF 12"x4" SEGMENTS SPACED AT A MAXIMUM 40' CENTER TO CENTER: CHANNELIZING LINES SHALL BE 12"x4" SEGMENTS SPACED AT MAXIMUM 20' CENTER TO CENTER. FREEWAY AND EXPRESSWAY GORE MARKINGS SHALL BE TWO CONTINUOUS LINES, 50' LONG, 4" WIDE.

THE MATERIAL FURNISHED SHALL BE FLEXIBLE RETROREFLECTIVE PERFORMED PRESSURE SENSITIVE TAPE FOR PAVEMENT LINES. IT SHALL BE FREE OF CRACKS WITH STRAIGHT EDGES AND CONSIST OF PIGMENT AND FILLERS, BUT HAVE SUFFICIENT BINDER AND PLASTICIZER TO RETAIN GLASS BEADS HAVING AN APPROPRIATE REFRACTIVE INDEX TO MEET MINIMUM REFLECTIVE INTENSITY STANDARDS OUTLINED IN THE MANUFACTURERS INFORMATION. MATERIAL SHALL BE FLEXOLITE "WET REFLECTIVE", 3M "SCOTCHLANE," OR APPROVED EQUAL.

GLASS BEADS SHALL BE MIXED UNIFORMLY THROUGHOUT THE MARKING MATERIAL WITH SUFFICIENT SURFACE BEADS TO PROVIDE OPTIMUM REFLECTORIZATION AT ALL TIMES.

THE MATERIAL SHALL HAVE A PRECOATED ADHESIVE LAYER FOR PAVEMENT APPLICATION WITHOUT THE USE OF HEAT, SOLVENTS OR ADDITIONAL ADHESIVES. THE ADHESIVE SHALL BE SUFFICIENT TO RETAIN COMPLETE MARKINGS ON THE PAVEMENT SURFACE THROUGHOUT THE USEFUL LIFE OF THE MARKINGS.

WHITE MARKING MATERIAL SHALL BE FREE OF TINT. YELLOW MATERIAL SHALL CONFORM TO COLOR NO. 33538 OF FEDERAL STANDARD 595.

IN ADDITION, ALL APPLICABLE MANUFACTURERS MATERIAL AND APPLICATION INSTRUCTIONS, IN FORCE AT THE TIME OF PLACEMENT, SHALL BE ADHERED TO. THE CONTRACTOR SHALL FURNISH TO THE ENGINEER CERTIFICATION THAT THE MATERIAL SUPPLIED MEETS THE PROPERTIES SPECIFIED HEREIN.

MARKINGS SHALL BE ACCURATELY LAID OUT IN CONFORMANCE WITH 621.051 AND SHALL BE LOCATED IN A TRUE LINE ON THE CENTER LINE, LANE LINE, OR CHANNELIZING LINE WHERE NORMAL PERMANENT MARKING WOULD LIE, UNLESS OTHERWISE SPECIFIED IN THE PLANS. THE TEMPORARY TAPE SHALL BE PLACED BY ROLLING THE MATERIAL INTO THE SURFACE.

AS AN ALTERNATE MATERIAL TO PAVEMENT MARKING TAPE, THE CONTRACTOR MAY FURNISH AND APPLY PAINTED RETROREFLECTIVE PAVEMENT MARKINGS CONFORMING TO 621. THE WIDTH AND LENGTH OF PAINTED SEGMENT SHALL BE THE SAME AS REQUIRED FOR TEMPORARY TAPE MATERIAL. THE PAINT APPLICATION RATE SHALL BE NOT LESS THAN 16 GALLONS PER MILE FOR A SOLID LINE NOR LESS THAN 0.4 GALLONS PER MILE FOR THE 12"x4" DASHED LINE.

THE CONTRACTOR SHALL PROVIDE COMPLETE PAVEMENT MARKINGS FOR ALL TEMPORARY ROADS CONSTRUCTED FOR THIS PROJECT, IN ACCORDANCE WITH MATERIAL AND PERFORMANCE REQUIREMENTS DESCRIBED HEREIN AND IN THE OHIO MANUAL AS DEFINED IN 614.03.

IN ADDITION TO THE REQUIREMENT OF 614.03, THE CONTRACTOR SHALL, PRIOR TO PLACING TEMPORARY MARKINGS, REMOVE ALL EXISTING CONFLICTING MARKINGS THAT ARE VISIBLE TO THE TRAVELING PUBLIC DURING DAYLIGHT OR NIGHTTIME HOURS. WHEN TEMPORARY MARKINGS ARE NO LONGER NEEDED, ANY CONFLICTING MARKINGS VISIBLE TO THE TRAVELING PUBLIC SHALL BE REMOVED BY THE CONTRACTOR BEFORE THE FLOW OF TRAFFIC IS DIVERTED TO THE NEXT PHASES. REMOVAL OF EXISTING OR TEMPORARY MARKINGS SHALL BE PERFORMED IN ACCORDANCE WITH 621.134. THE COST FOR REMOVAL OF CONFLICTING MARKINGS SHALL BE INCIDENTAL TO THE VARIOUS PAY ITEMS UNLESS SPECIFICALLY PAID FOR AS A SEPARATE ITEM.

METHOD OF MEASUREMENT AND BASIS OF PAYMENT SHALL BE IN CONFORMANCE WITH 621.15 AND 621.16 RESPECTIVELY FOR:

ITEM	UNIT	DESCRIPTION
614	MILES	TEMPORARY LANE LINES
614	MILES	TEMPORARY CENTER LINES
614	MILES	TEMPORARY CENTER LINES, AS PER PLAN (SEE NOTE BELOW)
614	MILES	TEMPORARY EDGE LINE, AS PER PLAN (SEE NOTE BELOW)
614	LIN. FT.	REMOVAL OF TEMPORARY MARKING

Center Lines, As Per Plan consist of solid double yellow lines.

Edge Lines, As Per Plan consist of solid white lines.

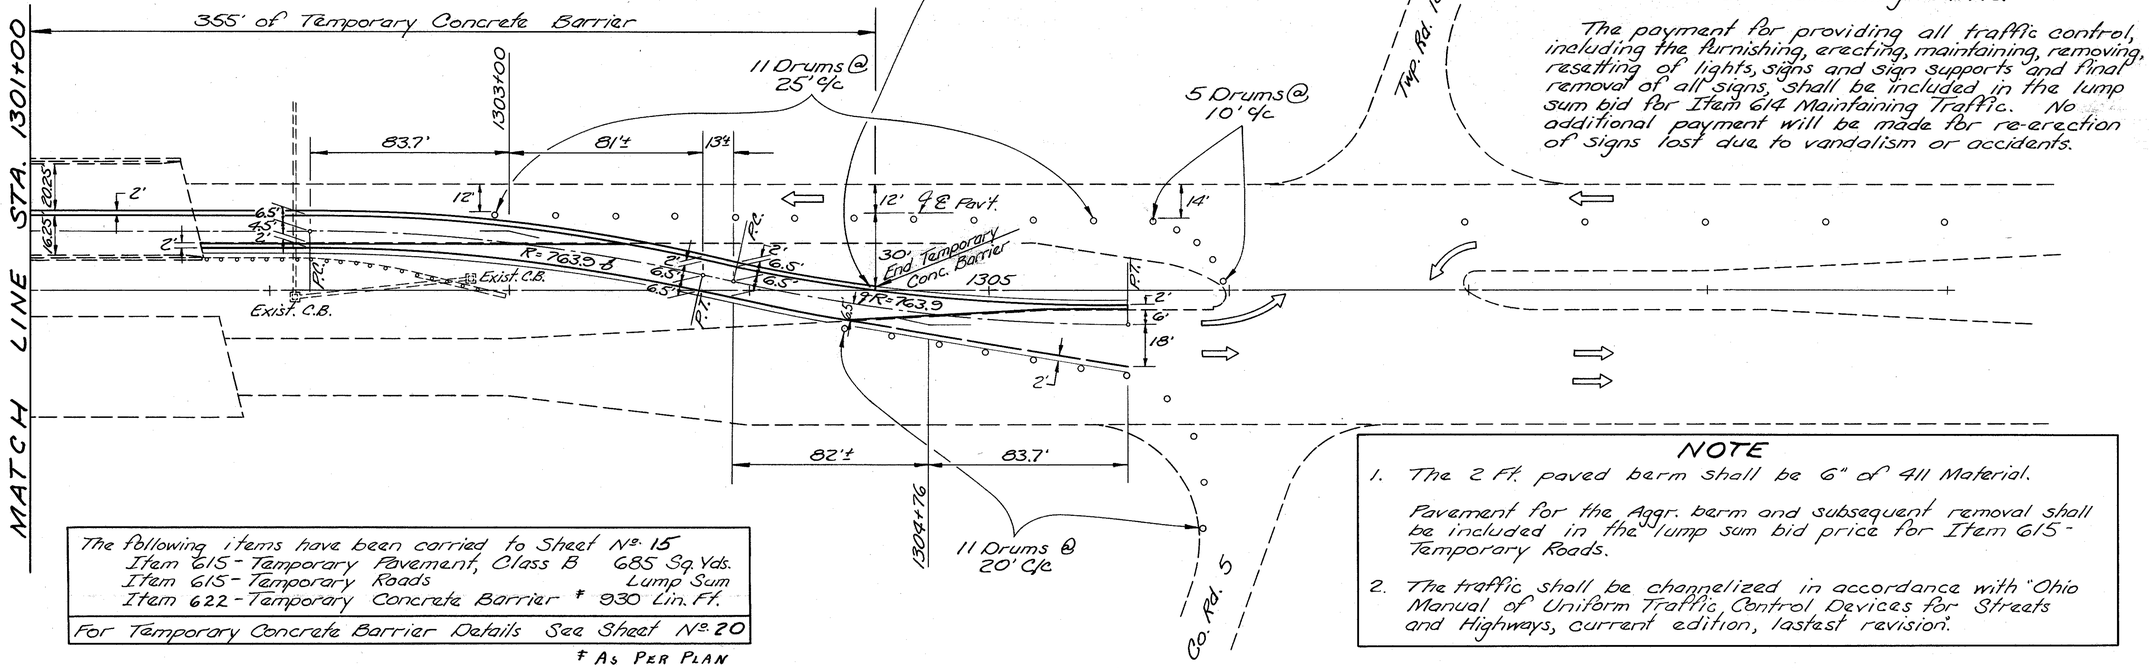
TYPICAL SECTION OF TEMPORARY PAVEMENT



The following items have been carried to Sheet No. 15

Item 615 - Temporary Pavement, Class B	685	Sq. Yds.
Item 615 - Temporary Roads	Lump	Sum
Item 622 - Temporary Concrete Barrier *	930	Lin. Ft.

For Temporary Concrete Barrier Details See Sheet No. 20

* As Per Plan

TRAFFIC MAINTENANCE NOTE

In addition to the requirements of the Ohio Manual of Uniform Traffic Control Devices, the contractor shall erect signs in accordance with the requirements shown on sheet No. 18 for directing traffic across median. Signs shall be erected either, 6 feet from the edge of the pavement, one (1) foot from the edge of the shoulder, or one (1) foot behind rail (whichever is farther from the pavement), at a minimum height of five (5) feet above the edge of pavement. Supports shall be driven a minimum of 3½ feet.

All signs and supports shown on sheet No. 18 will be furnished and erected by the contractor. Any replacements needed will also be furnished and erected by the contractor.

All signs with supports not listed on the plan shall be supported by methods as approved by the Engineer. When traffic is changed from one pair of lanes to the other the cross-over signs and supports shall be removed and re-set at locations shown on the plan.

Traffic control shown on these sheets are considered as minimum treatment and additional treatment may be required by the Engineer. If the traffic experience indicates the need for additional warning signals, lights and signs, they shall be provided consistant with the requirements of 614 Maintaining Traffic.

The payment for providing all traffic control, including the furnishing, erecting, maintaining, removing, resetting of lights, signs and sign supports and final removal of all signs, shall be included in the lump sum bid for Item 614 Maintaining Traffic. No additional payment will be made for re-erection of signs lost due to vandalism or accidents.

NOTE

1. The 2 Ft. paved berm shall be 6" of 411 Material.

   Pavement for the Aggr. berm and subsequent removal shall be included in the lump sum bid price for Item 615 - Temporary Roads.

2. The traffic shall be channelized in accordance with "Ohio Manual of Uniform Traffic Control Devices for Streets and Highways, current edition, lastest revision".

GENERAL NOTES

1. FLAGMEN SHALL BE USED TO CONTROL TRAFFIC CONTINUOUSLY FOR AS LONG AS ONE LANE OPERATION IS IN EFFECT. FLAGMAN SHALL COMMUNICATE WITH EACH OTHER AT ALL TIMES AS DESCRIBED IN THE OHIO MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES IN THE SECTION "FLAGMAN CONTROL". FLAGMEN STATIONS SHALL BE ADEQUATELY ILLUMINATED FOR NIGHT-TIME OPERATIONS BY USE OF A 175 WATT MINIMUM LUMINAIRE.

2. CONES, DRUMS, OR BARRICADES SHALL BE SPACED AT 50 FOOT CENTERS FOR THE FIRST 1000 FEET OF THE WORK AREA AND AT A MAXIMUM OF 100 FEET FOR THE BALANCE OF THE WORK AREA. CONES MAY BE SUBSTITUTED FOR BARRICADES OR STEEL DRUMS FOR THE LANE CLOSURES DURING DAYLIGHT HOURS ONLY.

3. SEVERAL SMALL WORK SITES CLOSE TOGETHER SHALL BE COMBINED INTO ONE WORK AREA TO MAKE A CLOSURE NOT MORE THAN 2000 FEET LONG INCLUDING TAPERS. CLOSURES MORE THAN 2000 FEET MAY BE APPROVED BY THE ENGINEER. THE MINIMUM LENGTH BETWEEN CLOSURES SHALL BE 2000 FEET. ONLY ONE SIDE OF THE ROAD SHALL BE CLOSED IN ANY ONE WORK AREA.

4. THE WORK TRUCKS SHOWN AT EACH END OF THE WORK AREA SHALL BE IN PLACE AND UNOCCUPIED WHENEVER MEN ARE WORKING WITHIN THE WORK AREA. THESE TRUCKS SHALL BE MOVED FROM THE PAVEMENT WHENEVER WORKMEN ARE NOT IN THE WORK AREA. OTHER PROTECTIVE DEVICES MAY BE USED IN LIEU OF THE WORK TRUCKS SHOWN WHEN APPROVED BY THE ENGINEER.

5. THE TYPE B HIGH INTENSITY BARRICADE WARNING LIGHT SHOWN ON THE ROAD CONSTRUCTION AHEAD SIGN, IS REQUIRED WHENEVER NIGHT LANE CLOSURE IS NECESSARY.

6. TYPE C STEADY BURNING BARRICADE WARNING LIGHTS SHALL BE ERECTED ON DRUMS OR BARRICADES FOR NIGHT LANE CLOSURES. MAXIMUM SPACING SHALL BE 50' CENTER TO CENTER IN ADVANCE OF THE WORK AREA AND 200' CENTER TO CENTER WITHIN THE WORK AREA.

GENERAL NOTES

1. THIRTEEN (13) DRUMS OR BARRICADES SHALL BE USED TO FORM THE LANE TRANSITION TAPER IN ADVANCE OF THE WORK AREA. FIVE (5) CHANNELIZING DEVICES SHALL BE USED TO FORM THE TAPER ON THE SHOULDER. CONES, DRUMS, OR BARRICADES SHALL BE SPACED AT 50 FOOT CENTERS FOR THE FIRST 1000 FEET OF THE WORK AREA AND AT A MAXIMUM OF 100 FEET FOR THE BALANCE OF THE WORK AREA. CONES MAY BE SUBSTITUTED FOR THE BARRICADES OR STEEL DRUMS FOR THE LANE CLOSURES DURING DAYLIGHT HOURS ONLY.

2. WHEN WORK IS BEING PERFORMED IN THE LANE ADJACENT TO THE MEDIAN ON A DIVIDED HIGHWAY, "OW-123-48" SIGNS SHALL BE SUBSTITUTED FOR "OW-122-48" SIGNS AND THE OW-60D SIGNS SHALL BE SUBSTITUTED FOR THE OW-60C SIGNS.

3. THE WORK TRUCK SHOWN AT THE BEGINNING OF THE WORK AREA SHALL BE IN PLACE AND UNOCCUPIED WHENEVER MEN ARE WORKING WITHIN THE WORK AREA. THIS TRUCK SHALL BE MOVED FROM THE PAVEMENT WHENEVER WORKMEN ARE NOT IN THE WORK AREA. OTHER PROTECTIVE DEVICES MAY BE USED IN LIEU OF THE WORK TRUCK SHOWN WHEN APPROVED BY THE ENGINEER.

5. TYPE C STEADY BURNING BARRICADE WARNING LIGHTS SHALL BE ERECTED ON DRUMS OR BARRICADES FOR NIGHT LANE CLOSURES. MAXIMUM SPACING SHALL BE 50' CENTER TO CENTER IN ADVANCE OF THE WORK AREA AND 200' CENTER TO CENTER WITHIN THE LIMITS OF THE WORK AREA.

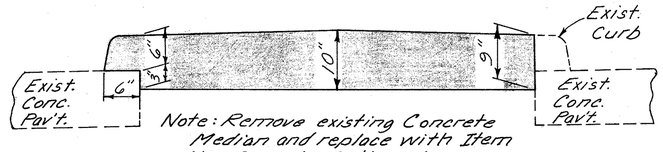
LEGEND

Existing Concrete Median To Be Removed

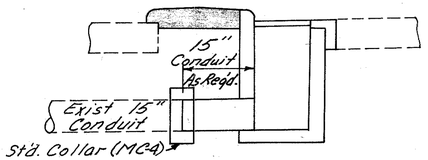
Item 612 ~ Concrete Median, Modified As Per Plan

Note: For Other Details See Standard Drawings MC-4, MC-6, & CB-3A



Note: Remove existing Concrete Median and replace with Item 612 ~ Concrete Median, Modified As Per Plan.

SECTION A-A



Note: Remove exist. catch basin and construct a St'd. Nº 3A Catch Basin at the same location and depth (4.5'). Connect the exist. pipe to the new catch basin with 15" Type B Conduit as required. The cost of the pipe shall be included in the unit price bid For Item 604 ~ Std. Nº 3A Catch Basin, As Per Plan.

SECTION B-B

QUANTITIES

Item 202 ~ Catch Basin Removed	1	Each
Item 202 ~ Curb Removed	15	Lin. Ft.
Item 202 ~ Concrete Median Pavement Removed	5	Sq. Yd.
Item 604 ~ Std. Nº 3A Catch Basin, As Per Plan	1	Each
Item 612 ~ Concrete Median, Modified As Per Plan	6	Sq. Yd.

Above Quantities Carried to General Summary

PROFILE CORRECTION QUANTITIES

NOTE: The Profile Correction table indicates stations and average depth of 848 Asphalt Concrete material to be added for profile correction.

When 848 Asphalt Concrete correction is completed it shall conform to the original profile grade line of the project.

An estimated amount of 101 Cu. Yds. has been carried to the General Summary for this work.

For profile correction details and quantities from Sta. 1099+75 to Sta 1105+00, See Sheet No. 42

Net Total		19,798.27	11318.03	18977.22	26682.46	1700
Total Length of 12' Lane		78475.98 Lin. Ft.				

Approximate No. of Transverse Joints (12' Wide) in mainline pavement = 78476 L.F. x 1 joint/60 L.F. = 1307.9 joints Use 1308 Joints

Estimate 20% of Transverse Joints in need of repair and average size of transverse joint repair to be 6' x 2'. ∴ Estim. partial depth repair Quantity for transverse joints = 0.20 x 1308 joints x 6' x 2' x 1 S.Y./9 S.F. = 348.8 S.Y. ∴ Use 350 Sq. Yds.

Approximate Length of Longitudinal Joints in mainline pavement = 7850' + 2(775') + 2(11683.9') + 7094.85' + 1700' - 1046.21' (Bridges) - 40.95' (Equations) = 40475.49 Lin. Ft.

Estimate 2% of above in need of repair average size 1' wide, ∴ Estim. partial depth repair Quantity for longitudinal joints = 0.02 x 40,475.49' x 1' x 1 S.Y./9 S.F. = 89.9 S.Y. Use 100 Sq. Yds.

∴ Estimated total quantity of Item Special - Partial depth Pavt joint repair = 350 + 100 = 450 Sq. Yds. Carried to General Summary See proposal note for description of this Item.

HAS-22-20.07

CALCULATION OF QUANTITIES REQUIRED FOR PROFILE CORRECTION FROM STA. 1099+75 TO STA. 1105+00

ITEM 301 - BITUMINOUS AGGREGATE BASE

Vol.(C.Y.) = Avg. Depth(Ft.) x Length(Ft.) x Width(Ft.) x 1/C.Y./27 Ft.³

Sta 1099+75 to Sta. 1100+98: V = 0.34 x 123 x 24.5' x 1/27 = 37.9 Cu. Yds.

Sta 1100+98 to Sta. 1103+40: V = 0.67 x 242 x 24.5' x 1/27 = 147.1 Cu. Yds.

Sta 1103+40 to Sta 1105+00: V = 0.38 x 160 x 24.5' x 1/27 = 55.2 Cu. Yds.

TOTAL = 240.2 Cu. Yds.

ITEM 304 - AGGREGATE BASE:

Vol.(C.Y.) = Avg. Depth(Ft.) x Length(Ft.) x Width(Ft.) x 1/C.Y./27 Ft.³

Sta 1100+98 to Sta. 1103+40: V = 0.74 x 242 x 25.8' x 1/27 = 171.3 Cu. Yds.

ITEM 605 - 6" UNCLASSIFIED PIPE UNDERDRAIN, 707.01:

Sta. 1101+75 ± : Length = 55 Lin. Ft. (See Note this Sheet)

The above Quantities are carried to the General Summary.

For Cross-sections and Earthwork Quantities, See Sheet No 43

* See General Note pertaining to Shoulder Treatment & 408 Prime Coat as per plan for Prime Coat and Soil Sterilizer Specifications and Application Rates.

~ EXISTING LEGEND ~

- (A) — Existing 9" Reinforced Concrete
- (B) — Existing Subbase
- (C) — Existing Stabilized Aggr. Shoulder
- (E) — Existing Stone Underdrains

~ LEGEND ~

- (1) (2) (4) — Item 848 ~ 1¼" Asphalt Concrete, Surface Course, Type 1, AC-20 / Item 848 ~ 1¾" Asphalt Concrete, Intermediate Course, Type 2, AC-20 / Item 407 ~ Tack Coat: RC-250, MS-2, RS-1, SS-1 or SS-1h applied at the rate of .01 Gal. Per Sq. Yd. and Cover Aggregate @ 7 lbs. Per Sq. Yd.
- (5) — Item 409 ~ Seal Coat Bituminous Material: MC 800, MC 3000, CBAE 800, RS-1 RS-2, CRS-1, CRS-2, RT-9 or RT-10 applied at the rate of 0.3 Gal. Per Sq. Yd. and N°8 Cover Aggregate @ 0.008 Cu. Yd. Per Sq. Yd
- (6) — Item 301 ~ Bituminous Aggregate Base: AC-20, RT-11 or RT-12
- (7) — Item 848 ~ 2" Asphalt Concrete Surface Course, Type 1, AC-20 *
- (8) — Item 605 ~ Aggregate Drains
- (9) — Item 408 ~ Prime Coat *
- (10) — Soil Sterilizer *
- (11) — Item 659 ~ Seeding & Mulching
- (12) — Item 606 ~ Guard Rail, Type 5, Using 9 Ft. Posts, As Per Plan

NOTE: Item 605 ~ 6" Unclassified Pipe Underdrain, 707.01 shall be installed transversely on the existing shoulder and pavement at the existing profile low point (approx. sta. 1101+75) and outletted thru the slope beyond the new type 5 guardrail. (Erosion control pad and 10' length of outlet pipe are not required).

CALCULATION OF QUANTITIES REQUIRED FOR PROFILE CORRECTION FROM STA. 252+75 TO STA. 258+50

ITEM 301 ~ BITUMINOUS AGGREGATE BASE

Vol.(C.Y.) = Avg. Depth(Ft.) × Length(Ft.) × Width(Ft.) × 1 C.Y./27 Ft.³

Sta. 256+76.09 to Sta. 258+12: V = 0.41' × 135.91' × 32.5' ÷ 27 = 67.1 C.Y.

ITEM 407 ~ TACK COAT

Vol.(Gal) = Length(Ft.) × Width(Ft.) × 1 Yd.²/9 Ft.² × 0.40 Gal./S.Y.

Sta. 252+75 to Sta. 253+42.83: 67.83' × 24' ÷ 9 × 0.40 = 72 Gal.

Sta. 256+67.09 to Sta. 258+50: 182.91' × 24' ÷ 9 × 0.40 = 195 Gal.

TOTAL = 267 Gal.

COVER AGGREGATE

Vol.(Tons) = Length(Ft.) × Width(Ft.) × 1 Yd.²/9 Ft.² × 7 lbs./S.Y. ÷ 2000

Sta. 252+75 to Sta. 253+42.83: 67.83' × 24' ÷ 9 × 7 ÷ 2000 = 0.6 Tons

Sta. 256+67.09 to Sta. 258+50: 182.91' × 24' ÷ 9 × 7 ÷ 2000 = 1.7 Tons

TOTAL = 2.3 Tons

ITEM 409 ~ BITUMINOUS MATERIAL

Vol.(Gal.) = Length(Ft.) × Width(Ft.) × 1 Yd.²/9 Ft.² × 0.3 Gal./S.Y.

Sta. 252+75 to Sta. 253+42.83: 67.83' × 8' ÷ 9 × 0.3 = 18.1 Gal.

Sta. 256+67.09 to Sta. 258+50: 182.91' × 8' ÷ 9 × 0.3 = 48.8 Gal.

TOTAL = 66.9 Gal.

COVER AGGREGATE

Vol.(C.Y.) = Length(Ft.) × Width(Ft.) ÷ 1 Yd.²/9 Ft.² × 0.008 C.Y./S.Y.

Sta. 252+75 to Sta. 253+42.83: 67.83 × 8 ÷ 9 × 0.008 = 0.5 C.Y.

Sta. 256+67.09 to Sta. 258+50: 182.91 × 8 ÷ 9 × 0.008 = 1.3 C.Y.

TOTAL = 1.8 C.Y.

ITEM 848 ~ ASPHALT CONCRETE SURFACE COURSE TYPE 1

Vol.(C.Y.) = Avg. Depth(Ft.) × Length(Ft.) × Width(Ft.) × 1 C.Y./27 Ft.³

Sta. 252+75 to Sta. 253+42.83: 0.09 × 67.83' × 32' ÷ 27 = 7.2 C.Y.

Sta. 256+67.09 to Sta. 258+12: 0.10 × 144.91' × 32' ÷ 27 = 17.2 C.Y.

Sta. 258+12 to Sta. 258+50: 0.125 × 38' × 32' ÷ 27 = 5.6 C.Y.

TOTAL = 30.0 C.Y.

ITEM 848 ~ ASPHALT CONCRETE INTERMEDIATE COURSE T-2

Vol.(C.Y.) = Avg. Depth(Ft.) × Length(Ft.) × Width(Ft.) × 1 C.Y./27 Ft.³

Sta. 256+67.09 to Sta. 258+12: 0.15 × 144.91' × 32' ÷ 27 = 25.8 C.Y.

The above Quantities carried to the General Summary

PAVEMENT REMOVAL DETAIL

ITEM SPECIAL:
~ FULL DEPTH RIGID PAVEMENT REMOVAL AND FLEXIBLE REPLACEMENT

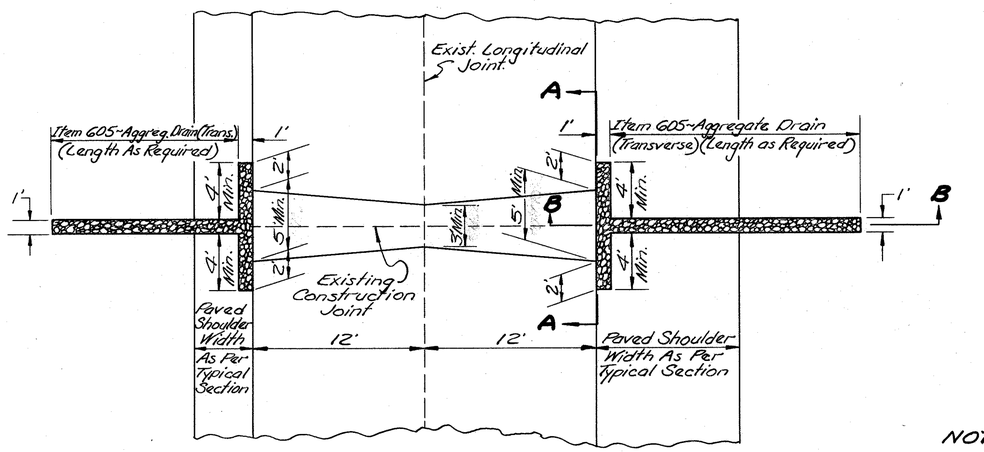
This Item shall consist of the full depth removal of deteriorated existing rigid pavement and its replacement with Item 301, in areas designated by the Engineer, in accordance with the note in the proposal. Use of this item shall be restricted to repair areas 10 feet or less in length.

Full depth repair areas shall be located and marked with paint by the Engineer prior to the start of the work. The limits of areas to be repaired may be adjusted at the direction of the Engineer. Rectangular patches may be used where they best fit the deteriorated areas.

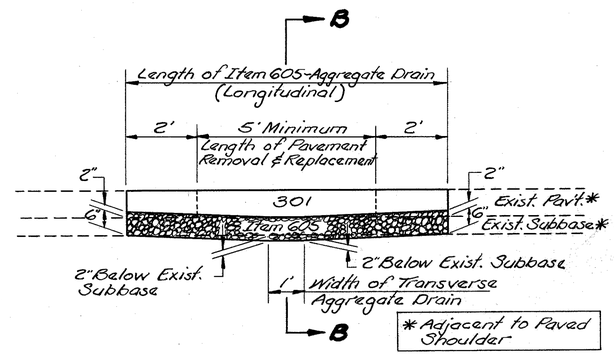
If unsuitable subbase is encountered in areas of full depth pavement removal, the Engineer may require its removal and replacement with Item 310~Subbase, Payment for which shall include any necessary excavation.

The following Estimated Quantities have been included in the General Summary for the above purposes:

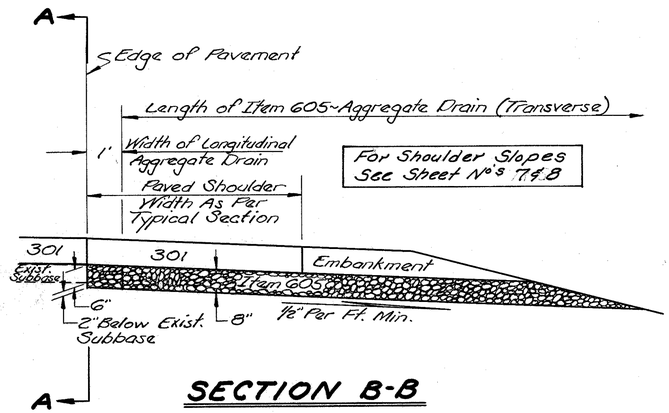
ESTIMATED QUANTITIES TO BE USED AS DIRECTED BY THE ENGINEER					
ITEM Nº	DESCRIPTION	W. BOUND	E. BOUND	TOTAL	Quantities Carried To General Summary
Special	Full Depth Rigid Pavement Removal and Flexible Replacement	384 Sq. Yds.	576 Sq. Yds.	960 Sq. Yds.	
310	Subbase, TYPE I, AS PER PLAN	64 Cu. Yds.	96 Cu. Yds.	160 Cu. Yds.	



PLAN



SECTION A-A



SECTION B-B

NOTES: Longitudinal aggregate drains shall extend two (2) feet beyond the ends of each full depth rigid pavement removal and flexible replacement.

Transvervse aggregate drains shall be constructed at each full depth rigid pavement removal and flexible replacement, and shall be adjusted to avoid any guard rail posts.

The cost of 301 material and embankment over the longitudinal and transverse aggregate drains shall be included in the unit price bid for Item 605~Aggregate Drains, AS PER PLAN.

ESTIMATED QUANTITIES - ITEM 605 AGGREGATE DRAINS, AS PER PLAN (For Flexible Replacement Areas Only)

Date: 6-12-80	Date: 6-12-80

Items Special: ~Removal and Replacement of Full Depth Portland Cement Concrete Pavement (See Proposal Note)
~New Transverse Joint Dowel Assembly (See above Proposal Note)

These items shall consist of the full depth removal of deteriorated pavement areas 10 feet or more in length and replacement with Portland Cement Concrete and New Transverse Joint Dowel Assemblies in accordance with the proposal note and details on this sheet.

Full depth repair areas shall be located and marked with paint by the Engineer prior to the start of the work. The limits of areas to be repaired may be adjusted at the direction of the Engineer.

If unsuitable subbase is encountered in areas of full depth pavement removal, the Engineer may require its removal and replacement with Item 310 ~ Subbase, Type 1, Grading A, payment for which shall include any necessary excavation.

The following estimated quantities have been included in the General Summary for the above purposes:

Removal & Replacement of Full Depth Portland Cement Concrete Pavement				
Item No.	Description	W. Bound	E. Bound	Totals
Special	Removal and Replacement of Full Depth Portland Cement Concrete Pavement	780 S.Y.	420 S.Y.	1200 S.Y.

~ Bond To Surface Thus Indicated Shall Be Prevented By Use Of Foil Or Other Suitable Bond-Breaker Barrier Satisfactory To The Engineer. Care Shall Be Taken Not to Displace Barrier When Placing Joint Sealer.

For Details Not Shown, See Standard Drawing BP-5.

Revised 5-28-80

TRAFFIC CONTROL NOTES

ITEM 621~PAVEMENT~MARKING, POLYESTER, AS PER PLAN

POLYESTER PAVEMENT MARKINGS SHALL CONFORM TO 621 EXCEPT AS FOLLOWS:

ALL REFERENCES TO PAINT SHALL BE CONSIDERED TO READ POLYESTER MATERIAL.

ITEM 621.02 MATERIALS IS HEREBY DELETED EXCEPT FOR GLASS BEAD REQUIREMENTS. IN ADDITION, PAVEMENT MARKING MATERIAL SHALL BE A RETROREFLECTORIZED POLYESTER COMPOUND AS MANUFACTURED BY THE GLIDDEN-DURKEE COMPANY OR AN APPROVED EQUAL.

ITEM 621.05 APPLICATION IS HEREBY MODIFIED AS FOLLOWS:
PARAGRAPH 4 IS CHANGED TO READ: WHEN POLYESTER MATERIAL IS APPLIED TO NEW BITUMINOUS PAVEMENT SURFACES, THE SPECIFIED APPLICATION RATE SHALL BE INCREASED 25 PERCENT ABOVE THE MINIMUM RATES SPECIFIED.

THE APPLICATION RATE TABLE IS HEREBY DELETED AND THE FOLLOWING ADDED:

THE MATERIAL SHALL BE APPLIED TO PROVIDE A UNIFORM THICKNESS NOT LESS THAN 15 MILS NOR MORE THAN 30 MILS. THE APPLICATION RATE FOR A SOLID LINE OF 4 INCHES IN WIDTH SHALL BE NOT LESS THAN 16 GALLONS PER MILE NOR MORE THAN 33 GALLONS PER MILE CORRESPONDING TO THE ALLOWED VARIATION IN LINE THICKNESS. APPLICATION RATES FOR DASHED OR DOTTED LINES AND FOR LINES WIDER THAN 4 INCHES SHALL BE PROPORTIONAL TO THE SOLID LINE RATES.

PARAGRAPH 5 IS HEREBY MODIFIED AS FOLLOWS:
THE RATE OF APPLICATION SHALL BE NOT LESS THAN 15 POUNDS OF GLASS BEADS PER GALLON OF POLYESTER MATERIAL APPLIED.

PARAGRAPH 6 IS HEREBY DELETED.

IN ADDITION TO 621 THE FOLLOWING SHALL BE REQUIRED:

EQUIPMENT

THE CONTRACTOR'S STRIPER SHALL BE EQUIPPED WITH AN ODOMETER GRADUATED TO 1/1000 OF A MILE. THE ENGINEER SHALL DETERMINE THE DEGREE OF ACCURACY OF THE CONTRACTOR'S ODOMETER AND ESTABLISH AN ADJUSTMENT FACTOR AS MAY BE REQUIRED TO ACCURATELY DETERMINE THE PAY ITEM QUANTITIES. THE ENGINEER SHALL PERIODICALLY CHECK THE ODOMETER OPERATION TO ASSURE MAINTENANCE OF ACCURATE MEASUREMENTS.

FAILURE OF THE ODOMETER TO FUNCTION PROPERLY SHALL BE CAUSE TO STOP THE WORK UNTIL THE ODOMETER IS MADE TO FUNCTION PROPERLY. IF MEASUREMENT OF THE WORK HAS TO BE PERFORMED BY THE DEPARTMENT, THE COST OF THE DEPARTMENT LABOR AND EQUIPMENT PLUS 10 PERCENT SHALL BE DEDUCTED FROM PAYMENT DUE THE CONTRACTOR FOR THE WORK. WHEN MEASURING LANE AND CENTERLINE MARKING, THE ODOMETER SHALL BE STARTED AT THE FIRST MARKED LINE AND REMAIN IN OPERATION, EXCEPT AT INTERSECTIONS AND OTHER LOCATIONS NOT MARKED, UNTIL THE END OF THE SECTION BEING MARKED, WHERE IT SHALL BE SHUT OFF AND THE READING OF THE ODOMETER RECORDED.

THE PAVEMENT MARKING EQUIPMENT SHALL BE EQUIPPED WITH A PRESSURE REGULATED AIR JET WHICH SHALL REMOVE ALL DEBRIS FROM THE PAVEMENT IN ADVANCE OF THE APPLICATOR GUN. THE AIR JET SHALL OPERATE WHEN MARKING MATERIAL IS BEING APPLIED AND SHALL BE SYNCHRONIZED WITH MARKING MATERIAL APPLICATION OR REMAIN "ON" AT ALL TIMES.

THE CONTRACTOR SHALL USE AN ACCURATE DASHING MECHANISM, CAPABLE OF BEING EASILY ADJUSTED, TO RETRACE EXISTING LANE OR CENTERLINE MARKINGS AS SPECIFIED IN THE PLANS OR AS DIRECTED BY THE ENGINEER.

THE CONTRACTOR SHALL FURNISH AND MAINTAIN THE RADIO EQUIPMENT NECESSARY FOR 2-WAY VOICE COMMUNICATION BETWEEN THE CONTRACTOR AND THE ENGINEER AT ALL TIMES DURING THE PAVEMENT MARKING OPERATION. THIS EQUIPMENT SHALL BE PROVIDED FOR THE TERM OF THE CONTRACT ONLY.

PROVISIONS FOR THE DESCRIBED SPECIAL EQUIPMENT BY THE CONTRACTOR SHALL BE INCIDENTAL TO THE APPLICATION.

ITEMS 621.12, 621.131 AND 621.132 RATE OF APPLICATIONS ARE HEREBY MODIFIED AS FOLLOWS:
POLYESTER MATERIAL SHALL BE APPLIED AT A RATE OF NOT LESS THAN 1 NOR MORE THAN 2 GALLONS PER 100 SQUARE FEET OF MARKING SURFACE.

ITEM 621.14 DEDUCTION FOR DEFICIENCY SHALL BE MODIFIED BY THE FOLLOWING ADDITIONAL REQUIREMENTS:

THE QUANTITY OF POLYESTER MARKING MATERIAL OR GLASS BEADS APPLIED PER UNIT OF MEASUREMENT WILL BE COMPUTED BY THE ENGINEER AT THE END OF EACH DAY'S WORK. A DAY'S APPLIED QUANTITY OF LESS THAN 5 GALLONS MAY BE INCLUDED IN THE NEXT DAY'S APPLIED MARKINGS FOR THE PURPOSE OF COMPUTING MARKING MATERIAL AND BEAD APPLICATION RATES.

THE CONTRACTOR SHALL PROVIDE A CALIBRATED MEASURING DEVICE TO MEASURE THE POLYESTER COMPONENTS IN THE TANKS.

THE QUANTITY OF POLYESTER MARKING MATERIAL USED SHALL BE DETERMINED BY MEASURING THE MARKING MATERIAL IN THE TANKS BEFORE AND AFTER MARKING MATERIAL IS APPLIED. THE CONTRACTOR SHALL PERMIT THE ENGINEER TO TAKE MEASUREMENTS WHENEVER REQUESTED. THE MARKING MATERIAL APPLICATION RATE SHALL BE DETERMINED BY DIVIDING THE TOTAL GALLONS USED BY THE APPROPRIATE MARKING LENGTH. ANY DETERMINATION OF PAY DEDUCTION RESULTING FROM SHORTAGES IN MARKING MATERIALS SHALL BE BASED ON THE MEASUREMENTS OBTAINED BY THIS METHOD. THE AMOUNT OF GLASS BEADS APPLIED SHALL BE ASCERTAINED BY THE ENGINEER BY OBSERVATION AND FROM INFORMATION SUPPLIED BY THE CONTRACTOR AS TO QUANTITY USED.

ITEM 621.16 BASIS OF PAYMENT SHALL BE MODIFIED BY ADDING THE WORDS "POLYESTER, AS PER PLAN" TO EACH ITEM DESCRIPTION.

844 REMOVAL OF GROUND MOUNTED SIGNS:

Ground Mounted signs shall be carefully removed where indicated on the plans. The signs shall be re-erected elsewhere on the project or stored on the project for salvage by State Forces.

To assure maintenance of adequate traffic control at all times, no signs shall be removed without the approval of the Engineer.

Re-erection may require field drilling and any necessary hardware shall be furnished.

Payment will be at the contract unit price for each sign removed and stored or re-erected, categorized as major signs. (40 Square Feet or larger) or other signs.

844	Each	Removal of Ground Mounted Major Sign and (Storage or Re-erection)
844	Each	Removal of Ground Mounted Sign and (Storage or Re-erection)

844 REMOVAL OF GROUND MOUNTED SIGN SUPPORTS:

Ground mounted sign supports shall be carefully removed where indicated on the plans and stored on the project for salvage by State Forces. Supports shall be removed with care to avoid damaging. Foundations for supports shall be removed to at least one foot below ground line with backfilling, restoration of surfaces and disposal of surplus material in accordance with 603.09.

Payment will be at the contract unit price for each support removed and stored, categorized as beam or post (№8 and smaller).

844	Each	Removal of Ground Mounted Beam Support
844	Each	Removal of Ground Mounted Post Support

844 SIGNS, BY TYPE:

Reflective sheeting for sign faces shall be Type F in accordance with 844.03.

844 SIGN SUPPORT ALTERNATE DESIGNS:

Alternate designs for sign supports such as differing engineering designs or different structural materials may be submitted by a bidding contractor to the department for acceptance. Alternate designs shall be submitted to the department at least 21 days in advance of the bid opening date and submission shall be to the following address:

Ohio Department of Transportation
Bureau of Design Services
25 South Front St.
Columbus, Ohio 43215

Notification of the acceptance or rejection of the alternate design will be given by the Department to the bidding contractor at least 7 days in advance of the bid opening date.

844 GROUND MOUNTED SUPPORT, NO. 4 POST, AS PER PLAN:

Special posts incorporating a square tubular top extension for mounting signs at right angles to other signs on the post shall be furnished, assembled and erected in accordance with TC-41.50 and the plans.

Payment will be at the contract unit price per linear foot of support overall length, furnished and in place.

844	Linear Foot	Ground Mounted Support, №4 Post, As Per Plan

ITEM SPECIAL- PATCHING CONCRETE BRIDGE DECK, TYPE II:
Specific locations and useage of this quantity shall be used "as directed by the Engineer" and shall be made a matter of record by incorporation into the final change order governing completion of the project. Estimated quantities of materials shall not be ordered or delivered to the project unless authorized by the Engineer.

CONCRETE OVERLAY NOTES ~ (BR. Nos. HAS-2126, HAS-22-2283 L&R, & HAS-22-2362 L&R)

1.) Preparation of Existing Decks for Concrete Overlay:
This work shall conform to the note in the supplemental specifications, except that if any reinforcing steel is damaged during surface preparation and scarification of the deck surface, the contractor shall repair said damage at no extra expense to the State.
No traffic shall be permitted on any portion of the deck which has been machine scarified.

~~2.) Selective use of Latex Modified Concrete:~~
~~If the Contractor bids the dense concrete option, he may, at his additional option, use Latex Modified Concrete (LMC) on any of the bridges overlaid on this project. On any such bridges the LMC work shall be as specified herein for the LMC option. The thickness shall be as specified for LMC. Payment for the LMC items shall be made at the unit prices bid for the respective dense concrete items: Item 850, dense concrete overlay (1¾ inches thick) and Item 850, dense concrete overlay (Variable thickness). Payment for Item 516, vertical extension of structural expansion joints, sealed as per plan, shall be made at the unit price bid without adjustment for the thinner plates. Quantities of affected roadway items shall be adjusted at the time of construction.~~

GENERAL SUMMARY FOR BRIDGE Nos. HAS 22-2126, HAS 22-2283 L&R, HAS 22-2362 L&R AND HAS 22-2460 L. (FOR BRIDGE Nos. 151-2310 AND HAS 22-2460 R, SEE SHEET No. 69&79)

601	20	Sq. yd.	Crushed aggregate slope protection
Special	35,857	Lbs.	Epoxy coated reinforcing steel, Grade 60 (see Proposal Note)

GENERAL NOTES

WORK REQUIRED:
1. Dismantle aluminum bridge rail and store for removal by State forces.
2. Remove concrete deck and railing, and approach slabs.
3. Remove structural steel and store for removal.
4. Remove entire forward abutment and portions of rear abutment.
5. Rebuild abutments as per plan.
6. Erect new structural steel and pour new superstructure.

REFERENCE shall be made to Standard Drawings:
RB-1-55 Revised 2-2-59
SD-1-69 Dated 6-12-69
BR-1 Dated 5-29-79 & Supplemental Spec. 852

DESIGN SPECIFICATIONS: This structure conforms to "Standard Specifications for Highway Bridges" adopted by the American Association of State Highway and Transportation Officials 1977 and the Ohio "Supplement" to these specifications, except the piers which conforms to requirements of "Design Specifications for Highway Structures" of the State of Ohio, dated 9-1-57.

DESIGN DATA:
Design Loading - HS-20-44 Case II and Alternate Military Loading
Concrete Class C - compressive strength 4000 p.s.i.
Concrete Class S - compressive strength 4500 p.s.i.
Structural Steel - ASTM A36 - unit stress 20,000 p.s.i.
Reinforcing Steel - ASTM A615, A616 or A617 - Grade 60, minimum yield strength 60,000 p.s.i.
Deck Protective Method - Epoxy coated reinforcing steel, top mat only. Monolithic wearing surface thickness is assumed to be 1".

REMOVAL OF PORTIONS OF EXISTING STRUCTURE: When no longer needed to maintain traffic, portions of the existing structure shall be removed. Structural steel shall be carefully dismantled and stored along the right-of-way for disposal by the State. This shall be included in Item 202, Portions of structure removed for payment.

PILES for the Forward Abutment shall be driven to bedrock. The bearing capacity shall be considered obtain by refusal on hard bedrock or by penetrating soft bedrock for several inches with a minimum resistance of 20 blows per inch. The design load is 55 tons per pile.

MAINTENANCE OF TRAFFIC: Traffic lanes with a minimum horizontal width as required by the general traffic plan and a minimum vertical clearance of 13'-8" shall be maintained on U.S. 22 at all times.

FIELD CHECK: The Contractor shall verify all dimensions in the field before ordering the new structural steel.

ALUMINUM BRIDGE RAIL REMOVED FOR STORAGE shall include railing, posts and bolts carefully dismantled and stored for removal by State Forces, included with Item 202, Portions of structure removed for payment.

CRUSHED AGGREGATE SLOPE PROTECTION shall be placed as directed by the Engineer to restore slope protection disturbed by new construction.

ITEM 519, PATCHING CONCRETE STRUCTURES shall be as directed by the Engineer to repair deteriorated concrete surfaces not included with new construction.

BACKWALL CONCRETE: In addition to the provisions of 511.08, backwall concrete above the bridge seat or backwall concrete above the optional construction joint at the approach slab seat shall not be placed until after the deck concrete in the span adjacent to the abutment is placed.

ITEM 516, EXPANSION AND CONTRACTION JOINTS shall be compression seals installed as per manufacturer's specifications.

TYPICAL TRANSVERSE SECTION

Each long line of reinforcing shall consist of 9 bars 30'-0" long plus one bar to finish out the total length of reinforcing in the deck. No. 4 bars shall be lap spliced 1'-7" and No. 5 bars shall be lap spliced 1'-7". The odd length bars are: SE403 replaces SE401, SE502 replaces SE501, S403 replaces S401 and S503 replaces S501.

NOTES

*A haunch width of 9" shall be used for computing quantity of concrete. However, the haunch width may vary between 6" and 12" provided that the slope shall be not more than 1:4 for a haunch less than 9" in width.

°Existing beams are 36 WF 150 in Spans 1 & 4, New W36x245 in Span 2, and W36x170 in Span 3. See framing plan, sheet 7/8.

‡The distance shown from top of deck slab to top of steel beam is the design dimension. The quantity of deck concrete to be paid for shall be based on this dimension, even though deviation from it may be necessary because the top flange of the beam may not have the exact camber or conformation required to place it parallel to the finished grade.

All welds & fit thicknesses are the same as on Std. Dwg. SD-1-69.

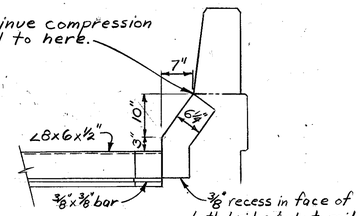
PART PLAN DECK

Typical - other end opposite hand



SECTION B-B

Section C-C

Alternate parts may be furnished subject to approval of the Director. Place parallel to direction of superstructure movement.

Bolts for field splices shall be 1" diameter, high-strength bolts ASTM A325 Type 3. For details of bolted field splices see Std. Dwg. SD-1-69.
Where a beam or plate is designated "CVN" the material shall meet specified minimum notch toughness requirements. All field splice material, except fills shall meet the requirements of notch toughness (CVN).

Welded attachments to the top flange of the facia beams for construction purposes are permitted provided that fillet welds less than 2" long and not closer than 1" to the edge of the flange are used.

PROPOSED PIER BEARING ELEVATIONS & SHIM PLATE SIZES*

LOCATION		A	B	C	D	E
1st Pier	ELEVATION	1201.45	1201.55	1201.65	1201.52	1201.38
	SHIM PLATE*	⅞"x1'-5"x2'-1"	½"x1'-5"x2'-1"	¼"x1'-5"x2'-1"	¼"x1'-5"x2'-1"	¼"x1'-5"x2'-1"
2nd Pier	ELEVATION	1201.61	1201.68	1201.81	1201.71	1201.54
	SHIM PLATE*	½"x1'-6"x2'-2"	⅛"x1'-6"x2'-2"	⅛" P.F.B.P.	⅛" P.F.B.P.	NO SHIM
3rd Pier	ELEVATION	1202.02	1202.12	1202.22	1202.09	1201.95
	SHIM PLATE*	1¼"x1'-2"x1'-11"	1¼"x1'-2"x1'-11"	⅜"x1'-2"x1'-11"	⅝"x1'-2"x1'-11"	¾"x1'-2"x1'-11"

* Shim plates are required to raise existing bearing seats to proper elevation. The Contractor is reminded to verify required shim plate thicknesses in the field. At the Contractor's option, shims may be multi-plate with minimum single plate thickness of ¼".

P.F.B.P. = Preformed Bearing Pad

Note: New bearing anchor bolts will have to be doweled in Pier 2. The new bolts shall be ½" longer than called for by Standard Drawing RB-1-55. The existing anchor bolts shall be removed 1" below the surface and the concrete patched.

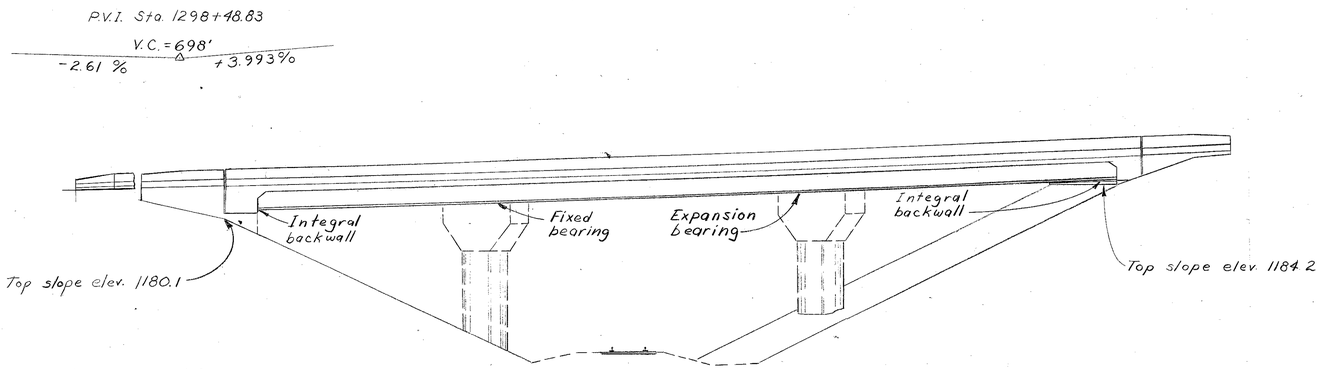
GENERAL PLAN



ELEVATION

GENERAL NOTES

PROPOSED WORK

1. Close roadway to traffic.
2. Remove existing superstructure and portions of abutment as per plan.
3. Raise beams and rebuild abutment bearings.
4. Place new superstructure with integral abutments.
5. Build approach slabs and other approach items.

DESIGN DATA:

Concrete Class C - compressive strength at 28 days = 4000 p.s.i.
Concrete Class S - compressive strength at 28 days = 4500 p.s.i.
Reinforcing Steel - ASTM A615, A616, or A617 - Grade 60, minimum yield strength 60,000 p.s.i.
Deck Protective Method: Epoxy coated reinforcing steel, top mat only.
Monolithic wearing surface thickness is assumed to be 1".

CONSTRUCTION CLEARANCE OF 8'-0" horizontally from the center of tracks and 20'-0" vertically from a point level with the top of the higher rail, and 4 feet from the center of tracks, shall be maintained at all times.

REFERENCE shall be made to Standard Drawings:
SD-1-69 Dated 6-12-69
AS-1-72 Dated 6-30-72
BR-1-67 modified Dated 10-15-71
and to Supplemental Specifications:
852 Dated 6-8-79

ITEM 601, CRUSHED AGGREGATE SLOPE PROTECTION is an estimated quantity to be used as directed by the Engineer to restore the existing slope protection to proper grade.

EXISTING ALUMINUM RAILING, posts and bolts are to be salvaged, and removed for storage by State forces as per Item 202; and shall be included in the lump sum bid for Item 202, Portions of structure removed.

RAILROAD AERIAL LINES- THE CONTRACTOR SHALL USE ALL PRECAUTIONS NECESSARY TO SEE THAT THE LINES ARE NOT DISTURBED DURING THE CONSTRUCTION STAGE AND SHALL COOPERATE WITH THE RAILROAD IN THE RELOCATION OF THESE LINES. THE COST OF THE RELOCATION, IF ANY, SHALL BE INCLUDED IN THE RAILROAD FORCE ACCOUNT WORK.

BEFORE THE START OF ANY DEMOLITION OR ERECTION OPERATIONS THE CONTRACTOR SHALL SUBMIT AND RECEIVE APPROVAL OF HIS SCHEDULING, METHODS OF DEMOLITION (INCLUDING REQUIRED BRACING AND SHORING), AND PROTECTIVE DEVICES. 7 COPIES OF THE ABOVE (PLUS AS MANY APPROVED COPIES AS THE CONTRACTOR REQUIRES BE RETURNED TO HIM) SHALL BE SUBMITTED TO:

ROBERT M. SHORT (ACTING), DISTRICT DEPUTY DIRECTOR
O.D.O.T. DISTRICT 11
BOX 261
NEW PHILADELPHIA, OHIO 44663

APPROACH SLAB JACKING HOLES, AS SHOWN ON AS-1-72, SHALL BE OMITTED. THE REINFORCING IN THE TOP OF THE SLAB SHALL BE 3" CLEAR.

PLAN

PIER PART ELEVATION

NOTE 'A': Steel shims 10"x 1'-8" with varying thicknesses will be required at both piers to adjust existing bearings to proper elevations. This will require that 1¼"ϕ x 3½" long extensions be welded to existing anchor bolts. These will be included with Item 513, Structural steel for payment. At the Contractor's option steel shims may be multi-plate with minimum single plate thickness of ½". Average total shim thickness is 3¼", but Contractor shall field check this dimension to meet proper elevations from the table below.

TABLE OF ELEVATIONS*

	A	B	C	D	E	F
Rear Pier	1182.51	1182.70	1182.88	1182.94	1182.87	1182.79
Fwd. Pier	1184.01	1184.20	1184.40	1184.46	1184.39	1184.33

*Elevations given are for setting bottom plate of existing bearing plates.

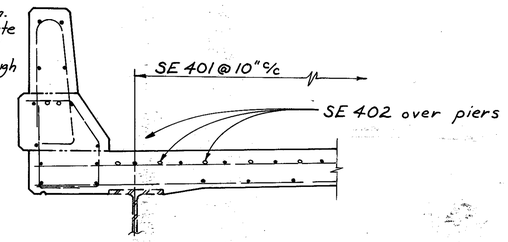
SCUPPERS shall be in accordance with Std. Dwg. SD-1-69 except that scupper pipes shall extend 8" below the bottom of the beams instead of 2".

HALF TRANSVERSE SECTION

** This is the design dimension. The quantity of deck concrete to be paid for shall be based on this dimension, even though deviation from it may be necessary because the top flange of the beam may not have the exact camber or configuration required to place it parallel to the finished grade.

A HAUNCH WIDTH of 9" shall be used for computing quantity of concrete. However, the haunch width may vary between 6" and 12".



PART TRANSVERSE SECTION
