ENVIRONMENTAL SOS

<div>Additional Comments:</div> <div> <div>CE Document</div> <p>It is possible that we may be able to reduce the CE to a level C2. This will be driven by the results of the project’s ecological coordination and the project’s real-estate impacts.</p> <div>Public Involvement</div> <p>The project will require a release on ODOT’s &/or the County’s web site and property owner notification letters (PONL) soliciting public comment. The consultant will need to receive and formally respond to all comments and prepare a comment summary for the project file.</p> <div>Asbestos</div> <p>If any structures are taken, asbestos inspections of those structures will be required. Asbestos inspections for structures other than bridges are handled through the real-estate process.</p> </div>
