

MAY 2026 PROGRAMMATIC

D11 Proj.: CAR-212-3.91 PID 122333

Ohio Department of
Transportation

This presentation will provide an overview of the subject project that will be placed on the upcoming programmatic selection for consultant design services.

CAR-212-3.91 PID 122333

- Proj. Description: Replace bridge carrying State Route 212 over Holmes Run.

2 | Proj. CAR-212-3.91 PID 122333

Department of
Transportation

The project will replace bridge CAR-212-3.91 (SFN 1001442) carrying state route 212 over Holmes Run.

AVAILABLE PROJECT INFORMATION

- Some project information is available at the following FTP site:
 - <https://ftp.dot.state.oh.us/pub/Districts/D11/122333>
 - The PIP will be released through SAFE on the programmatic scheduled date
 - D11 does not release the PIP early
 - All information on the FTP site is subject to change, please review the information in SAFE to create your LOI

Additional project information is available on the District 11 ftp site, at the link shown on your screen. The Project Initiation Package document, along with a more complete and detailed scope of work will be released through The ODOT Scope and Fee System (or SAFE) at the request for LOIs. All information on the FTP site is subject to change. Ensure you review the ftp site and the information in SAFE before completing your LOI for this project.

TIMS MAPPING

The screenshot displays the TIMS web application interface. At the top, there is a green header with the TIMS logo and a search bar. Below the header, a map shows a project alignment in blue and green, with a specific location marked '122333 Bridge Preservation'. The map includes street names like 'DUMMETTS RD SW', 'DORRANCE RD SW', and 'CARRY RD SW'. Below the map, there is a table with project details:

GIS_ID	PID_NBR	DISTRICT_NBR	LOCALE_SHORT_NME	COUNTY_NME	PROJECT_NME	CONTRACT_TYPE	PRIMARY_FUNI
88529	122333	11	CAR	Carroll	CAR SR 212 3.8	Standard Build	District Preserv

At the bottom of the interface, there is a footer with the text '4 | Proj. CAR-212-3.91 PID 122333' and the Ohio Department of Transportation logo.

Here is an image showing the anticipated project limits from ODOT's TIMS application. The project will follow the existing horizontal and vertical alignments as much as practical.

PROJECT SCOPE

- The major items of work include:
 - Replace bridge.
 - Newer bridge will be wider. Width to be determined at consultant scope meeting.
 - The Village of Leesville has an active transportation plan that may include SR 212 through this section. The final alignment of the Shared Use Path through this area is not yet determined but should be known at the consultant scope meeting after the selection process is complete.
 - Better align bridge with stream.
 - Protect bridge from scour
 - Soil Borings required.
 - Project is located within the UASCE flowage easement of Dover Dam. All project fills must be balanced with equal cuts. A net zero fill in the flowage easement is required.

The major scope items are listed here. An updated and more complete list will be released in SAFE at the beginning of the LOI process.

CONSULTANT PREQUALIFICATIONS

- Level 1 bridge inspection
- Level 2 bridge design
- Non-complex roadway design
- Various Environmental
- Various Geotechnical
- Limited R/W

The consultant prequalifications required for this project are shown here.
