Subject: GEA SR 608 03.09 Buggy Lane Files
Attachments: Attachments.html

Brian,

Below is a link for the GEA SR 608 03.09 Buggy Lane files. The information is separated into three sections;

- Developed by CMT
- From ODOT
- From Others

We have not included the MicroStation DGN files that were used to develop the *BUGGY_Lane_PlanSheets-20170502(reduced).pdf* at this time as they include linework from previous alternatives. If it is determined that those files are needed, please let us know and we will provide them.

If you have any questions, issues downloading the files from ShareFile, would like to discuss any of the items included or believe something is missing, please do not hesitate to call or email.

ShareFile Attachments Expires February 13, 2018

GEA-608_Buggy	776.3 MB
