This improvement has been declared a limited access highway from Station 339+50 I-77 to Station 472+75 I-77 by the action of the Director of Highways and recorded in Volume 46 Page 17 of the Director's Journal pursuant to law.

CENTERLINE REFERENCE MONUMENTS AS PER PLAN

Just prior to seeding and protecting, monuments shall be constructed at the location called for on the plans of Class "C" concrete, cast-in-place in a circular hole, eight inches in diameter and 44 inches in depth. The top of the concrete shall be finished to 2 inches below the ground level and the upper six inch portion of the concrete shall be formed. A 1/2 inch steel rod six inches long center punched (center punched from reference stakes in presence of inspector after concrete is set and cured) shall be embedded in the wet concrete as directed by the Engineer. Care shall be exercised to provide the accuracy of 0.02 feet of the previous established station point. The layout work necessary to provide this accuracy shall be included in the lump sum bid for "construction layout stakes."

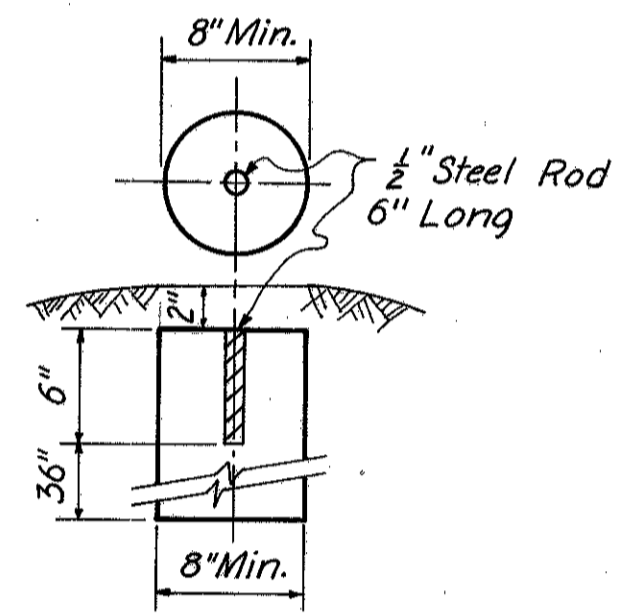

The work in the Item 604 centerline reference monuments shall be paid for at the contract unit price for each centerline reference monument, completed and accepted, which price and payment shall constitute full compensation for all excavation and backfill, furnishing, hauling and placing all concrete, steel rods, forms, and for all labor equipment tools and incidentals necessary to complete this item.
