Dave,

Good morning. I'm sorry for the delay.

You can download the files here from the Baker FTP site:

<https://eFTP.mbakerintl.com/message/lrdDQ67fcTnYp9FIPLvsME>

The file naming convention follows ODOT standards. Some of the files encompass the entire CCG3 project area, while others reflect work done within the CCG3A limits only.

- BC – Aerial and Ground topo combined
- BD – Drainage
- BK – Geometry (alignments)
- BP – proposed roadway
- BR – Right-of-Way
- BT – Traffic Control
- BU – Utility
- FB – Survey Field Book

Hi Derek,

Any update on these CADD files?

Thanks!
Dave

Subject: Innerbelt CCG3A CADD Files

Derek,

I am following up on our call from yesterday afternoon.

ODOT is requesting up-to-date CADD files for the area of I77 – specifically the area of the 3 proposed 3 bridge deck replacements as part of new PID 119380. ODOT plans to provide this information to potential firms interested in this project in the May 2023 programmatic selection process. As I mentioned, ODOT will provide the raw 2020 ORD aerial mapping information along with the CCG3A Stage 2 plan set.

My initial thought is to ensure that the CADD information includes alignments that your firm has established for this area, along with proposed CCG3A line work, so that everyone is aware of the proposed work planned for PID 82382.

We would like to receive this information no later than Friday, April 28th.

If you have any questions, please let us know.

Thanks!

Dave
