Yes to all and sorry for the confusion!
Thanks

Thanks Jim!

ODOT has asked for a quick clarification.

Please confirm:
- Use an acorn style top for Tremont acorn fixtures;
- Use a Cleveland style fitter for Gateway Lantern (octagonal) fixtures;
- CPP wants MH to be used instead of High Pressure sodium for light poles and underpass lights in the vicinity of LED lighting fixtures.

Type yes, and we are off and running.

Thanks Jim!

Mark,
I have reviewed and approve the Tremont lighting plan and the use of the Acorn style post top luminaire with the Cleveland style fitter.
Thanks

James A. Ferguson

Hi Jim,

I spoke with Mike Gallagher of RL Lang, our project vendor for the light fixtures and poles. He said he normally supplies:

- Acorn tops (not Victorian) for the Acorn (Tremont) Fixtures and
- Cleveland fitters for the Octagonal (Gateway) fixtures (Cleveland is a special fitter style, not found in the catalog.).

Please confirm this is acceptable, and we will specify it this way in the plans.

Thanks,

Mark
