Re: Pike Natural Gas

Date: 9/01/05

By: MDW

Tom Myers of Pike Natural Gas called our office after speaking with Clyde Willis, Scioto County Engineer. Tom was trying to obtain a permit from Scioto County to install a natural gas line along the north side of Lucasville-Minford Road. Clyde told him to coordinate with us concerning the location of the ROW line for our proposed work on L-M Road. Tom would like to locate his new facility outside the proposed ROW – he is asking that we indicate the distance from the center of the existing road to the proposed ROW. I told him we will look at our current plans and assess where the location of the ROW will likely be. We will send him PAVR stage plans as well.
