OHDOT Training

Current Training:

OpenRoads Designer Survey Training

OpenRoads Designer Design Training
Coming Soon!

Steps to set up a training

Outside ProjectWise
1. SetUp Training WorkSpace (if standards **ARE NOT** local than your **CADD MANAGER** should do this step.)
    a. Copy and paste your current OHDOT.cfg workspace config file, renaming it to OHDOT_Training.cfg
    b. Open OHDOT_Training.cfg and change the _USTN_WORKSETSROOT variable to equal a location on the c drive (C:\OHDOT_Training\Worksets\)
    c. Save the file
2. Locate training files

   \\..\OHDOT\Standards\OHDOT Utilities\Training\OpenRoads\ORD Survey\WorkSet_Templates\

3. Copy everything within a given training's WorkSet_Templates folder to the location set by the _USTN_WORKSETSROOT variable in step one.
   (e.g. C:\OHDOT_Training\Worksets\)
    a. If folders are missing create them.
4. Open OpenRoads Designer and select the OHDOT_Training Workspace, you should now see the training worksets that you copied in step 3.

Inside ProjectWise
Note this only works if a managed workspace has been set up.

1. Check with CADD Manager on if there is a location within projectwise that should be used for training worksets.
2. Locate training files within managed workspace,
    a. pw:\\..\OHDOT\Standards\OHDOT Utilities\Training\OpenRoads\ORD Survey\WorkSet_Templates\
3. Copy everything within a given training's WorkSet_Templates folder to the location specified in step 1.
4. Upgrade to WorkArea all folders at the root level that were copied.
5. Make sure a workspace is set for all the newly upgraded workareas
    a. WorkArea Properties > WorkSpace > WorkSpace level > right click add association and select OHDOT workspace.
6. For all newly upgraded workareas there is a config file (.cfg) with the same name as the workarea. Move this corresponding config(.cfg) into the WorkArea Folder.

Training Guides

Training guides for training can be found inside the OHDOT standards. An example location of the Survey training guide is listed below.

\\..\OHDOT\Standards\OHDOT Utilities\Training\OpenRoads\ORD Survey\Guides\

Training Videos

In addition to training guides there are also videos to supplement the training guides. Videos can be found on our YouTube Channel here, Videos are grouped by training into playlists.
