(L.L.) Landlocked Residue
* Indicates that a parcel has been added at the end of the Summary

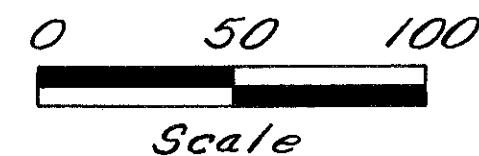

Notes: Where T.B.A. for any parcel is taken from more than one volume and page; see plan sheet for complete breakdown of T.B.A. and residue.

In all cases T.B.A. is shown exclusive of P.R.O. on this plan.

To determine a property owners true record area after out-sale add the T.B.A., P.R.O. and residue left and right.

NOTE: The Contractor will be responsible for maintaining service in the existing water line until the following has been complied with. Before beginning work on the 6" encasement pipe he shall notify the property owner approximately when he expects to complete the work. When the work is completed he shall notify the property owner and the property owner shall have 30 day from date of notification to relocate the water line. When the 30 day period has expired the Contractors responsibility to the existing water line shall terminate.

Note: All Utilities have General Contract Easements.

Note: The Alternate Method of stationing tangent lines for point reference was used through portions of the curve that is spiraled.

NOTE: The Contractor will be responsible for maintaining service in the existing water line until the following has been complied with. Before beginning work on the 6" encasement pipe, he shall notify the property owner approximately when he expects to complete the work. When the work is completed he shall notify the property owner and the property owner shall have 30 days from date of notification to relocate the water line. When the 30 day period has expired the Contractors responsibility to the existing water line shall terminate.

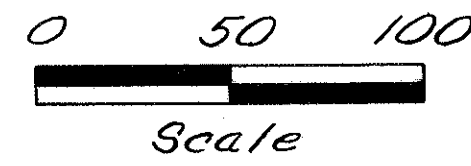

Note: All Utilities have General Contract Easements.
