Subject: RE: ODOT SR-435 Telecom Conflict

Hello Andrew,

Thank you for the ROW plans that you sent me I am currently reviewing them. Once I have time to determine the conflicts I may have a better idea of a timeline for design and construction. This stretch of 435 has major conduit structure with several man holes that is a vital backbone of our infrastructure. Please consider any options there maybe to avoid it as this would be a very timely and costly relocation. Having said that, the initial email that I sent you with conduit plates only covers the area in the attached photo and is only a partial basic review of this site.

Scott, just following up on the below chain. How long (approximately) would it take AT&T to re-design a relocation plan from the day they are given notice of the conflict? How long (approximately) would it take AT&T to complete the relocation work once the permit has been approved by ODOT?

Hello Andrew,

Thanks for sending the plans unfortunately I am blocked from opening them. Is there another format that you could use to resend them to me. Thanks

Importance: High

Scott,

Please see attached for ODOT's ROW plan that shows the preliminary layout of the widening and roundabout. This project is a design-build project and the design is not final. There is a good chance the final design conflicts with the duct bank AT&T has running along SR-435 on the south side. The Design Build Team that is awarded the contract will determine this in early stages of design; and I assume a

likely scenario would be that AT&T has to relocate from MH NO 11539 all the way down to SR-729 at MH NO 11280.

How long (approximately) would it take AT&T to re-design a relocation plan from the day they are given notice of the conflict? How long (approximately) would it take AT&T to complete the relocation work once the permit has been approved by ODOT. This does not have to be exact, but I am just seeking a reasonable estimation of # of days.

Brandon,
Is this one of your areas?
I have Fairfield County not Fayette County.
Thanks,

Importance: High

All,

There was a telecom line picked up on the survey for ODOT's SR-435 widening and roundabout project in Fayette County. The OUPS ticket did not receive responses, but AT&T and Spectrum were noted as owners in the area.

The line runs along EB SR-435 down to SR-729 and then turns and runs along SR-729. Could someone from both AT&T and Spectrum please identify their facilities in this area, including the line shown below?
