JEF-SR 7-30.92

This is an ODOT decision document. A copy has been uploaded to Environet.

Mike,

I've completed the review of the RMR Screening for this project. Based on the information provided, a plan note for the proper management of coal ash should be placed into the construction plans for any excavation. No further RMR is warranted for the project, however, if the plans change and include any part of the coal ash pond, and/or deep additional excavation, further RMR may be required.

If you have any questions or need additional information, please let me know.

Julie
