

inter-office communication

to: RICHARD RANDOLPH, DISTRICT CONSTRUCTION ENGINEER date: AUGUST 8, 1991
from: C.J. McCLURE, DIST. D&P ENGR. BY S.W. HOFFMAN, SURVEY SUPERVISOR
subject: REQUEST TO RAISE MONUMENT BOXES

The Survey Department requests that a change order be processed to raise monument boxes and supply new lids for these boxes on Project 905-90; Woo I-7500.00. It has been determined that nine (9) monument boxes were omitted from the construction plans for the current upgrading project. These monument boxes were covered during the 1968 resurfacing project, and the current project gives us an opportunity to bring them to the surface. Since these monuments are on the township line between Bloom Township and Henry Township, they are important to the Survey Department and the Wood County Engineer.

The location of the monument boxes is as follows:

STATION	NORTHBOUND LANES	SECTION CORNER	TOWNSHIP
79+33	X	West 1/4 Post, Sec. 30	Bloom
79+58	X	East 1/4 Post, Sec. 25	Henry
105+81	X	N.W. Corner, Sec. 30	Bloom
106+01	X	N.E. Corner, Sec. 25	Henry
132+06	X	West 1/4 Post, Sec. 19	Bloom
132+48	X	East 1/4 Post, Sec. 24	Henry
158+28	X	N.W. Corner, Sec. 19	Bloom
158+95	X	N.E. Corner, Sec. 24	Henry
171+93	X	East 1/4 Post, Sec. 13	Henry

The Survey Department will locate the monuments and assist the contractor when the boxes are raised.

If this request meets your approval, please contact Mr. Parquet, Field Engineer for the project, at your earliest convenience.
